

Step Up Math

The purpose of the Step Up Mathematics (SUM) program is to increase the mathematics achievement of students in Title I schools. Title I SUM teachers focus on helping students develop mathematics concepts, problem solving strategies, and computational skills. They work with classroom teachers to assess students' strengths and needs and to plan appropriate mathematics instruction. SUM teachers provide ongoing professional learning for teachers in their schools. They work in classrooms as well as with small groups of students. Instruction is based upon the FCPS Program of Studies (POS), the Virginia Standards of Learning (SOL), and the National Council of Teachers of Mathematics (NCTM) Standards.
