

weCare@school

A wireless emergency care information service for schools

Provides parents with secure web-based access to update their students' emergency care information

Provides first responders in schools (principals, nurses, police officers, etc.) with access to emergency information via wireless devices and cell phones

How weCare@school Works

- 1) The parent accesses and updates their child(ren)'s emergency care information
- 2) An e-mail is sent to the parent as confirmation of their submission
- 3) The SIA accesses the information and confirms it
- 4) An e-mail is sent to the parent as confirmation of the update
- 5) The information updates the SASI database(s)
- 6) The information is made available to the 1st responders to emergency situations using a handheld device

Made possible in part by a grant from the Technology Opportunities Program (TOP), National Telecommunications and Information Administration, U.S. Department of Commerce
