

Summer Assignment for Honors Chemistry:

Choose an experiment you want to do for the Science Fair. It must be something that is testable. This means you must have a control, an independent variable, and a dependent variable. Go to the website <http://www.sciserv.org/isef> for information on the science fair. When you come to school in September, you should have a clear idea as to what experiment you want to conduct for the Science Fair.
