

Homework Session #3

Next week we will be using the scanner, flex cam and digital camera in order to capture pictures for our webpages. Your task this week is to bring in photos, books with pictures, objects (ie. a basketball, horse statue, art supplies, etc.), or draw pictures that you can use. Paper has been provided if you want to draw pictures. Keep the following things in mind when drawing.

1. The camera and scanner pick up brightly colored objects best. Fill in the whole object. For instance, if you are drawing a butterfly, color in the whole butterfly.
2. Press hard with your crayons or pencils. Markers work well.
3. Images show up much better if you outline them with a small black marker. Outline each part of the picture.
4. Only put your **first name** on the picture.
