

Dear Second Graders at Kings Park,

I am so excited that you are enthusiastic and ready to work on a sculpture project to contribute to the museum. Each sculpture should:

- realistically or abstractly represent one of the tribes you've studied
- include the homes, environment, type of transportation and occupations of the tribe
- be three-dimensional
- be interesting from all sides of the sculpture
- stand 3-6 feet tall
- include any other accurate information you want to share

Finally, please keep in mind that your sculpture should be completed as a tool for other people to learn from. After viewing your sculpture, a person should walk away having learned all about the tribe you are representing.

Remember to have fun and be as creative as you can!

Fondly,
Roger Totem
