

# SPORTS MEDICINE

# SPORTS MEDICINE

- ◆ Sports Medicine is offered as an elective course for high school students. The course was developed to introduce students to the field of sports medicine. Sports medicine is a broad profession that requires the cooperation of many allied health and medical professionals. This course has a strong focus on human anatomy and physiology; prevention, recognition, and rehabilitation of athletic injuries; and basic first aid.

# OTHER INFORMATION

- ✦ Students should understand that this course does not prepare them to practice sports medicine.
- ✦ Students will have the opportunity to become CPR/FA certified. The care they could provide to others is limited to the guidelines of the American Heart Association.
