

10.29.07

Dear Abigail,

New and creative ideas are the foundation of all things. Without them, we wouldn't have all these great things we take for granted. I feel that your ideas for our M2P projects help not only us, but the whole project takes on a shape that has quality.

Each M2P project is a work of art. As you know, it takes time and patience to make art. You've molded, painted, shaped – however you want to call it – our project “Shanaynay” into something beyond what we expected.

You've also analyzed beyond the big picture. You've carefully thought out each step in the creative process, and have come up with methods and ideas that were truly influential. I thank you for giving me this crystal clear insight on things.

Sincerely, Stevens
