

Paragraphing

- `<P> TEXT HERE</P>` = Paragraph

- `
 TEXT HERE</br>` = Line Break

Both codes should turn out like this:

- Paragraph:

`<p align=DIRECTION>TEXT</p>`

Hello

in DIRECTION, put left, right, or center. OR, a simple code for just centering:

Goodbye

`<center>`

- Line Break:

Hello

Goodbye

Putting It All Together

- `<P> TEXT HERE</P>`

- `<P> TEXT HERE</P>`

This is what the final code should look like:

Hello

Goodbye

HTML Design Tips

Ways To Make Your Webpage Cooler

A Tutorial

Prepared By:

Kelsey Tedder

Advanced Multimedia Productions

Luther Jackson Middle School

Want to make your webpage cooler?

This is a quick overview of everything in the tutorial

Text

- Color

(blue, red, green, yellow etc.)

- Font

(Arial, Comics Sans MS, Rockwell, etc.)

- Paragraphs

(paragraphing, line break, tab)

Font

This is how to change the font of your writing

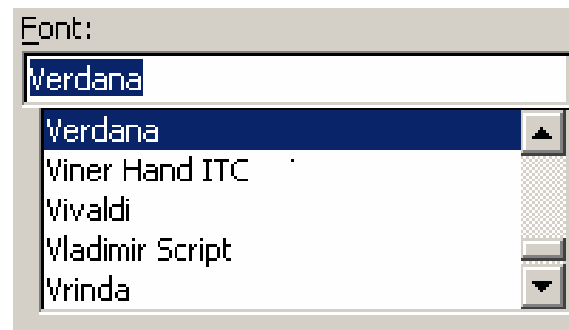

- `TEXT HERE`
- Font name example: Verdana

This font code should turn out like this:

HelloGoodbye - Script MT Bold

HelloGoodbye- Papyrus

HelloGoodbye- Magneto

COLOR

This is how to change color

- `TEXT HERE`
- Hex code: A six digit code signifying a certain color (000000 = black)

This color code should turn out like this:

HelloGoodbye

HelloGoodbye

HelloGoodbye

FFCCFF	FF99FF
FFCCCC	FF99CC
FFCC99	FF9999
FFCC66	FF9966
FFCC33	FF9933
FFCC00	FF9900
CCCCFF	CC99FF
