### Typing software for purchase, available on Amazon.com

The benefit to purchasing the software on Amazon is that you can read customer reviews and possibly receive free shipping.

### Type to Learn 4 – Home Purchase

This is the software we use at school and that students really love! If you purchase it for home use, however, your child’s progress will not be linked to their progress at school. This means, they will have to start from scratch and progress through the lessons from the beginning, no matter what lessons they’ve already done at school.
