

Pi Day

March 14,

2008

Poplar Tree ES Sixth
Grade

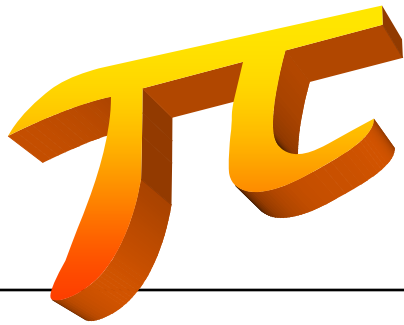

**We might share
our pies!**

**We might
. . . not!**

Apple Pie
Blueberry pie
Peach Pie
Pumpkin Pie

No, no, no

We're talking about the Math π
You know the one that they use
to measure the
circumference of a ring

Oh, that π !

Sure I know a song about that
one, let's sing

$\pi \pi \pi \pi \pi$, 3.14 is the way

We'll measure circles on Pi Day.

Michael T

I really like Pi

There are many reasons why
My calculations show 3.14
That the value of Pi is helpful
to know

Using Pi will allow you to find
the circumference of the
circle and area too

Use this daily and it will
educate you.

Aaron S.

Do you prefer
Oreo cookie or
Chocolate chip
or Banana cream
or Pecan or ...?

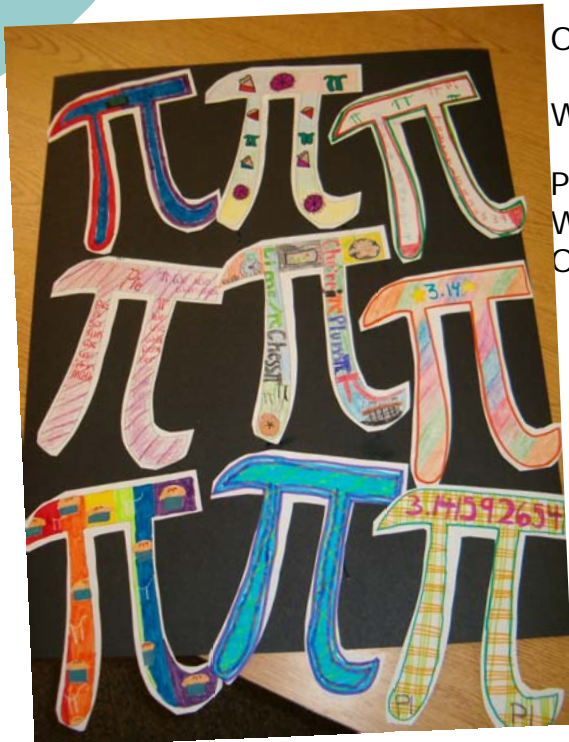

Math is sometimes confusing
It requires some common sense
Like when you find the perimeter
Of a white picket fence

Area is a little harder
Deeper you need to think
Like when you find the area
Of a wide kitchen sink

Math became fun,
When we started learning pi,
I thought she meant like
apple crisp
Or even cherry pie

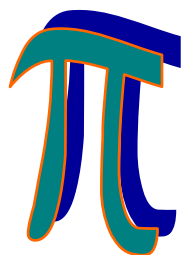

When it came to my
surprise,
Pi was equal to 3.14
Which helped find the area,
Of a circle and much more.

Brooke F.

Today is the day to celebrate Pi!
Today is the day to celebrate Pi!
3.1415926535

**Pi is huge, many numbers that's a fact,
It starts with three and never ends,
The number is very packed.**

**Pi is a number that starts with 3,
It is very helpful as you will see.**

**Pi is the ratio of circumference to the D,
So if you are stuck on a problem
Pi will guide you to victory!**

**Try it once and you will see,
That $C = \pi \times D$**

**Pi is an irrational number,
Try to memorize it and you'll probably slumber! By Patrick**

*There is a number called "Pi".
He is given so much importance
That he made the other numbers ask "Why"?
His use, to calculate area and circumference,
Of all the circles made them jealous,
So they started to "cry"
Now all that talk of Pi
Has made me hungry and I am craving
For a slice of Apple Pie*

by Nikita

Imagine an infinite number
That never really ends
You try to solve it harder
But the logic never bends.

It may be known as $22/7$
Or possibly 3.14
But to get to the end of it
You're never really sure!

by Ani

What's so great about Pi?

Me and my sister were sitting side by side.
Then the little girl looked up at me
And asked, "What is so great about Pi?"
"Well," I said "Pi has a definition.
If you don't mind Pi is a number like 5.
Also, he is a very nice friend of
Circumference.
They're friends because $C=2\pi r$.
That is what is great about Pi."

by Virginia

It's known as 3.14159.
The use of π is international.
It's more popular than Hannah
Montana
Even though it's totally irrational.

I've heard some people claim that π^2
They're saying it all over town.
But when my mother bakes a π
It always turns out round.

by Chase

Pi Not Pie

Pies are delicious
Pi is ridiculous!

Pi is old,
Pie can be served cold.

Pi is always the same number,
Pies make ME slumber!

Pi r squared.
Pie is best shared.

I am going to east some pie.

Good bye!

by Julian

I once met a number named pi
When he told me how long he
was I said "Oh My"
He just never seemed to end
His voice never did descend
That long, long number pi
by Nikhil

Pi is great,
It keeps going and going
It just seems to be a mystery,
It is an irrational number
It is a spiral of numbers as long
As can be
You will never find the end of it
3.14159265358979323846264338...

That is pi!

By Alli

*The number pi goes forever
Does it possibly end?
Never.*

*Left of the decimal point three
To say the whole long thing is too long
for me.*

*I would much rather eat peach pie,
than listen to all of that pi
Recited until the day I die
And longer than forever.*

Will it ever end? I think never...

By Hannah

Pi is a number,
That you learn in math.
It is so long
That all you can do is laugh.

I'm not talking about the pie
That you can eat.
And it's not blueberry, cherry
or double Dutch meat!

See, the pi that I'm talking
'bout is 3.14
It goes on and on and on
oh such a bore!

When measuring a circle,
pi is what you use
circumference is what you'll
come up with
it just makes me snooze!

I wish pi were pie
so we could all cheat,
and run out of math
and go to an all-you-can-eat.

Pi is an irrational thing
It goes and goes and
goes
It doesn't stop, never
once
Maybe that's why I make
a fuss,
I always seem confused.

I wish it were simple.
That crazy number,
So small yet so large.
I'm lost in a world of curiosity.
I can't seem to remember,
How it even starts!
But I won't give up,
Just like Pi,
I'll keep going and going and going
And maybe one day,
Maybe at noon
I'll find out Pi,
Will take over soon!

by Madison
