

# Project Ideas (grades K-2)

## Science

- Conduct an experiment where something changes (scientific method optional) - Plants, weather, food science, ecology, etc...
- Tell all about an important scientific discovery
- Find out about space travel while you soar into the solar system
- Pretend you are inside a ship traveling through the human body

## Time Travel

- Research an important person or event in history
- Explain what your life would be like if you lived some time in the past
- Imagine and describe what life might be like in the future

## Technology

- Make your own web page using Geocities or Freeservers.com
- Design your own invention, toy or game
- Design a "Rube Goldberg" invention
- Explain how something works

## Literature, Art or Music

- Write your own book, collection of stories, or collection of poetry
- Make a themed mobile or collage
- Write new words to a song or rap based on a theme

## Social Studies

- Share discoveries about a certain culture or country
- Pretend you are a famous explorer and write about your adventure

## Expand on A Classroom Project

- Expand on a classroom assignment or project and create a display to share at \$WYK Expo

**Use Your Imagination!!**
