

Project Ideas (grades 3-6)

Science Experiments using the Scientific Method (see format attached)

Weather Chemistry Astronomy Physics Plants Ecology
Food Science Engineering

Architectural Design/City Planning

- Design a school, amusement park or city
- Design a “green” town (ecology-friendly)

The Past

- Compare past and present
- Document “a day in the life of...”
- Research an event or era

The Future

- Create future means of transportation, communication, or housing
- Design your own futuristic city
- Save the planet – show others how to “go green”

Art and Literature

- Create your own book or collection of stories
- Investigate a period of art or a particular artist
- Research the publishing process

Social Studies

- Investigate world cultures or religions
- Create your own maps of a geographic region
- Find a way to solve a world problem
- Compare different types of world governments

Technology

- Create your own website using HTML code (no use of sites like Geocities)
- Research the development of technology
- Design or build a robot
- Design your own “Rube Goldberg” invention

Use Your Imagination!!
