

Worm Survey

1st describe the soil. What does it look like? Smell like? Feel like?

Using sticks plot out a section of land that is 24 inches by 24 inches. Using this information how long and how wide do you think the garden bed is? Why.

Dig down 12 inches and look for worms. Keep track of how many you find.

Describe and draw your worms? What color are they? Are they fat, skinny, long, short?

What can worms do for the soil?

Do you think the school garden has enough worms? Why?

What could we do to make more worms want to live in our garden?
