

Children's Philanthropy Center (CPC)

An Educational, Research, Training Institute for 21st Century Learners

Our students are social entrepreneurs, individuals who recognize a social problem and use entrepreneurial principles to organize, create, and manage a venture to make social change. Whereas a business entrepreneur typically measures performance in profit and return, a social entrepreneur assesses success in terms of the impact s/he has on society. The main goal of social entrepreneurship as well as social enterprise is to further social and environmental goals. Here, at the Children's Philanthropy Center, we strive to do just that!

21st Century Initiatives

The S.T.A.M.P. of Excellence

With an emphasis on Science, Technology, Art, Music, and Performance, the fundamental design of our program is to facilitate new approaches to learning that draw upon a range of insights into the human brain.

Activities are developed around the individual needs of students. Through our program and service initiatives, we seek to help students strengthen cognitive functioning and co-creative processes. Each participant is provided a unique opportunity to learn about needs in their environment and perform meaningful service (enhanced by instruction and reflection) to enrich their learning experiences, teach civic responsibility, and strengthen communities.
