

LAUREL HILL MATH NIGHT

Thursday, February 16, 2012

$$2+2=4$$

$$6\div 3=2$$

$$4\times 7=28$$

Dear Parents and Students,

The Laurel Hill faculty is inviting you to attend Math Night. Parents and students will participate in sessions taught by classroom teachers. Come explore hands-on ways to understand strategies that can be used to help with math practice at home. We will provide childcare for children 5 years and under. Please R.S.V.P. by returning the bottom portion of this flyer to classroom teachers by **Wednesday, February 8, 2012**.

Schedule

- We will have four rotations simultaneously for grades K-2 and grades 3-6. The session locations are TBD.
- 6:15-6:30 Registration
- 6:30-6:40 Welcome and Introduction
- 6:45-8:00 Rotations
- 8:00-8:10 Evaluations in last session

K-2 Topics

- Math Happening: How to help students make connections to math in their everyday worlds
- Addition and Subtraction: Alternative strategies and algorithms
- Estimation: Why students need to estimate and a variety of strategies
- Counting Money: Tools and strategies to use to understand, use, and count money

3-6 Topics

- Vocabulary for Problem Solving: Key words in word problems and how to explain thinking in writing
- Multiplication and Division: Alternative strategies and algorithms
- Breaking Apart Numbers: What it means to regroup, borrow, carry, etc.
- Fractional Concepts: Understanding and converting fractions, decimals, and percents

Please R.S.V.P. by returning this portion to classroom teachers by **Wednesday, February 8, 2012**.
