

Installing Get Utility on the Windows Platform

Installation

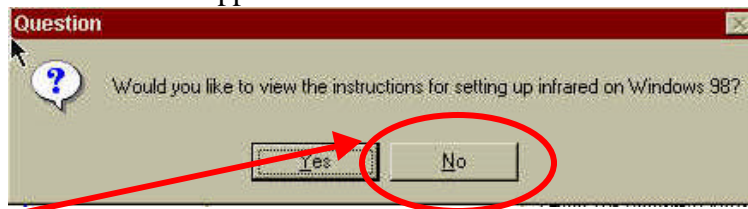

Don't just simply say "yes" to make that window go away!!!

- 1) Place the Get Utility CD in the tray and allow a couple of seconds for the installation wizard to automatically launch.
- 2) A welcome window will appear. Read and click **next**.
- 3) A licensing agreement will appear. Read and click **yes**.
- 4) A destination location will appear. Read and click **next**.
- 5) A program folder window will appear. Read and click **next**.
- 6) The program will begin to install and you will see a series of bar graphs showing the installation progress.
- 7) A question window will appear that looks as this:

Click **no**.

- 8) A question window will then appear that looks like this:

Again, click **no**.
