

W. T. Woodson High School Parking Lot Changes
Monday April 9, 2007 (The day we return from Spring Break)
Please allow an extra 15 minutes in the AM the week of April 9.

MAJOR FEATURES:

(1) Construction on the fine arts wing will extend the building to the west and effectively seal off the current passage from the front driveway to the Whitacre Road side lot. This will prevent people from moving to and from the side lot near Whitacre to the front circles with the trailers.

(2) There will be five parking lot entrances along Whitacre:

#1 -- the current entrance to the front circles -- This will be for **buses and selected faculty** members. Visitors can use this to park after 8am.

#2 -- a new entrance onto Whitacre more or less in line with the dumpsters -- This entrance will be for remaining **faculty** members.

#3 -- the existing entrance across from Trapp Road for **student parking permits #001 to #100**. The cutoff may change up or down, if needed.

#4 -- a new entrance which is already partially constructed more or less at the end of the green truck lot -- this will be for **Kiss & Ride** only in the AM.

#5 -- the existing stadium entrance will be used for all **remaining student parking**.

(3) Other Features:

There will be new striping, although in some cases the striping will be done with dashes or less resilient paint until additional islands are put into place and permanent striping can be done at the end of the project.

Unless we discover problems with this design once it is in use, this should be better in most respects than what we have now, and things will get better with each future adjustment.

(4) In the future, possibly some time next fall semester:

> Entrance #1 will be closed permanently so functions #1 and #2 will be combined. Details are still being worked out. The rationale is that existing entrance #1 is simply too close to Main Street to allow traffic to queue to the light at 236 during congested periods.

> A new bus only passage will be opened through School Board Property entering Pickett at Starlit Ponds Drive. This will pull bus traffic from the service road to Pickett.

(5) In the deeper future, probably for the 2009-2010 school year, a second Kiss & Ride will open in front of the building for traffic coming from the East. This can't be opened until the end of the project because it is under several trailers.

Thanks for your understanding as we enter the next phase of renovation.
