FCPS email	Email from principal	Yes	Kent Gardens ES;Chesterbrook ES;Franklin Sherman ES;Haycock ES	Changing the boundaries will potentially alleviate the the overcrowding at KG but only if considered together with how KG manages attendance for French Immersion. The boundary changes should apply equally to students who are/aren't in French Immersion.	If French Immersion is not addressed together with boundary changes, the changes could appear to be targeted at families who speak a second language at home and are less likely to participate in FI. Also, without including FI students in rezoning, the boundary changes will have to be much larger to have the intended impact. The ultimate end will be less non-FI students at KG, which could be viewed as targeted at certain minority families.	To be least disruptive to students, boundaries should only be changed for those schools that feed 100% into Longfellow: Chesterbrook, FS, and Haycock.	Parent or Caregiver

On paper it is easy to see where/how changes could be made, but these are our children, and most families are highly invested in their school and neighborhood s and would prefer to stay where they are.	The school community needs to hear about plans beyond rezoning.
