ASSISTIVE TECHNOLOGY SERVICES ATS FAIRFAX COUNTY PUBLIC SCHOOLS

General Education **Continuum of Assistive Technology Support** Special Education

Technology Tools	Technology tools that are a part of the core of the FCPS Digital Ecosystem and are available for use by all students in FCPS. These tools can be used to differentiate instruction for all students and provide access to the curriculum. Examples include: Google Suite for Education, Microsoft Office	Technology tools that are a part of the Grade Level/Program category of the FCPS Digital Ecosystem and are individually assigned to students. These tools might be recommended as part of an assistive technology (AT) evaluation if the student requires the support of an AT Coach in order to implement the tool effectively. Examples include: Natural Reader, Bookshare, Google Voice Typing	Technology tools that are primarily implemented through school teams by Assistive Technology Services (ATS). These tools are recommended by Assistive Technology Services (ATS), FCPS offices or a school as a part of an assistive technology evaluation. Examples include: Dynamic display communication devices, switches for computer access, Read&Write
ATS Support	AT Coaches can consult with school teams to provide information regarding use of inclusive tools to differentiate instruction for students.	AT Coaches can consult with school teams to support the implementation of these tools. These students may also be on the ATS caseload if they require support from an AT Coach.	AT Coaches will integrate assistive technology accommodations with school teams as a part of the Assistive Technology Services (ATS) caseload.
