June 8, 2020

To support continued learning for students during this extraordinary time, FCPS is providing this Learning Packet to use during the summer months for Early Childhood Special Education students. The activities in the packet provide opportunities to practice and apply skills while supporting student needs for engagement, critical thinking, and movement. The activities provided are designed to be easily implemented in your home and community.

Students who met the criteria for ESY will be assigned a teacher to provide lessons based on the packet. Lessons will be individualized to support students in maintaining critical life skills as outlined in their IEP.

The packet will also be posted on Blackboard 24-7.

"Play is the work of young children." - Irene Sege

To best support your child's learning, set aside time each day to play with your child. Developing routines with your child provides them with structure and supports learning
