# RESULTS LETTER - AT 91 ${ }^{\text {ST }}$ PERCENTILE OR HIGHER IOWA ALGEBRA APTITUDE TEST (IAAT) 

Dear Parent(s)/Guardian(s) of $\qquad$ :

Earlier this year your child took the lowa Algebra Aptitude Test (IAAT). This was the first step in the screening process for placement in Algebra 1 Honors in the following academic year. A student must score at or above the $91^{\text {st }}$ percentile to continue in the screening process. I am writing to inform you that your child scored at the $\qquad$ percentile on this test.

The next step towards Algebra 1 Honors placement for the following year will be to take the Virginia Standards of Learning (SOL) Grade 7 Mathematics test in the spring of this year. A student must show mastery of middle school mathematics as evidenced by a score of 500 or above on the SOL Grade 7 Mathematics test at the end of this academic year in order to be enrolled in Algebra 1 Honors for next year.

During the summer, middle school staff will use the IAAT and SOL scores to make the appropriate mathematics placement. If your child meets the criteria for both assessments, they will be placed in Algebra 1 Honors. If your child only meets one of the criteria, they will be placed in Mathematics 7 Honors. If your child qualifies for Algebra 1 Honors but you would prefer a Mathematics 7 Honors placement, please notify the middle school about your preference over the summer.
