FAIRFAX COUNTY PUBLIC SCHOOLS

ADOPTED | FY 2023-27

Scott S. Brabrand, Superintendent 8115 Gatehouse Road Falls Church, Virginia 22042

December 16, 2021

MEMORANDUM

TO: School Board

FROM: Scott S. Brabrand, Ed.D.

SUBJECT: Capital Improvement Program (CIP) Fiscal Year (FY) 2023-27

I am pleased to submit to you the proposed Capital Improvement Program (CIP) for the Fiscal Year (FY) 2023-27.

Between School Year (SY) 2012-13 and SY 2019-20, Fairfax County Public Schools (FCPS) CIP Planning student membership has grown by an average of more than 1,000 students each year for a total membership growth of more than 7,500 students. The COVID-19 pandemic has had an impact resulting in a decline in student membership. This has resulted in the membership within CIP Planning to decrease from 188,236 in SY 2019-20 to 179,542 in SY 2020-21. This decline continued in SY 2021-22 to 177,931 students. The overall decline in CIP Planning membership has been a total of 10,305 students since SY 2019-20. The future impact will depend on many factors, including the future course of the pandemic and economic conditions.

Recent growth in FCPS has been uneven throughout the division for various reasons, including changes in population, new development, and migration. These trends of growth are inconsistent across the county and continue to present a facilities capacity challenge. Despite the planned additional capacity intended to address current and projected needs, uneven membership changes throughout the county, along with the existing fiscal constraints, will necessitate the continued consideration of boundary adjustments to take advantage of available capacity whenever it is practicable to do so.

The capital funding stream shown in the FY 2023-27 CIP reflects \$360 million approved by county voters in the 2021 School Bond Referendum. The bond includes funding the renovation of two high schools and 12 elementary schools, and the site acquisition for one high school.

Funding for capital improvement projects is currently limited by a \$180 million yearly cap on General Obligation Bonds by the financial management principles of the Fairfax County Board of Supervisors. Providing the additional new schools and capacity enhancements required to accommodate membership growth will cause delays in the schedule of many future renovation projects. Fairfax County government and FCPS staff have been working to develop ideas and strategies for the future that will better integrate the needs of both capital programs and identify areas for improvement.

School Board Page 2 December 16, 2021

The Fairfax County School Board (FCSB) and Board of Supervisors (FCBOS) formed a committee in FY 2014 to study ways to solve the long renovation cycle of our schools due to the limited capital funding available. The Infrastructure Finance Committee recognized that the bond items, which pertain to the replacement of key infrastructures such as roofs, parking lots, and mechanical systems, were delaying the implementation of school renovations and established an annual transfer for infrastructure management. As a result of the committee, the FCBOS has provided an annual transfer of \$13.1 million to FCPS to offset the infrastructure replacement, benefiting renovation projects in the near future.

Another such initiative is the Joint Board of Supervisors/School Board Capital Improvement Program Committee. This committee was formed in FY 2021 to discuss the CIP and allow for better information sharing, prioritizations, and planning by both the county and FCPS. Through the work of this committee, the capital project schedule assumes the continuation of an annual limit of \$180 million for general obligation bond funding by the FCBOS, with an increase of \$25 million in FY 2023 and FY 2024 followed by an increase of \$50 million beginning in FY 2025, for a total of \$230 million annually in future years.

The FY 2023-27 five-year capital requirement totals approximately \$1.2 billion. The five-year requirement represents roughly 70 percent of the approximately \$1.7 billion total CIP cost for FY 2023-32. Funds approved in the 2021 School Bond Referendum and previous referenda will address approximately \$0.5 billion of the five-year requirement leaving a balance of approximately \$0.7 million unfunded. We anticipate the next bond referendum in the fall of 2023.

Capital improvement requirements for the ensuing five-year period (FY 2028-32) have been included in the CIP to conform to Fairfax County's CIP format. Approximately \$0.5 billion in capital project requirements are included within this out-year time frame.

We continue to enhance the CIP to assist readers in understanding our long-term goals as we continue to contend with changing demographics and limited capital funding. New to this version of the CIP is the inclusion of nontraditional schools in the capacity section and an inventory of prayer/reflection rooms, all-gender/single-user toilets, private changing areas, and lactation support spaces by school. Additionally, the CIP continues to include a five-year membership projection set and an assessment of facilities with program capacity utilization, which were not included in the CIP last year due to the changing conditions of the COVID-19 pandemic and a virtual start to school.

HIGHLIGHTS

SUMMARY HIGHLIGHTS

The Fiscal Year (FY) 2023-27 Capital Improvement Program (CIP) updates and builds upon the previously approved program of capital expenditures. The CIP project schedule assumes the continuation of an annual limit of \$180 million (M) for general obligation bond funding by the Fairfax County Board of Supervisors (FCBOS), with an increase of \$25M in FY 2023 and FY 2024 followed by an increase of \$50M beginning in FY 2025, for a total of \$230M annually in future years. School construction projects approved in the November 2021 School Bond Referendum are included in this CIP as funded projects.

Each year, following the certification of the September student membership, Fairfax County Public Schools (FCPS) produces a new five-year projection set that is used to update the capital planning needs for the next five-year timeframe. A new projection set is created annually to adjust to shifts in membership trends as they are occurring and begin with the identification of the change in membership from the previous year to the current year. The COVID-19 pandemic has had an impact resulting in a decline in student membership within CIP Planning from 188,236 in school year (SY) 2019-20 to 179,542 in SY 2020-21 and continuing to decline in SY 2021-22 with 177,931 students. The future impact of the overall decline in membership of 10,305 students since SY 2019-20 will depend on many factors, including the future course of the pandemic and economic conditions.

The Capital Construction Cash Flow (Cash Flow) is updated annually to show current and anticipated funding for capital projects planned in the next 10-year timeframe. Capital projects reflect the reality that Fairfax County continues to urbanize, and the total number of housing units is expected to rise. Recent housing forecasts for Fairfax County show that single-family detached housing units will continue to make up the largest number of units by type, while the largest percentage of growth will occur in the multifamily housing type. FCPS is monitoring new residential development for the potential impact of future schoolaged children on membership numbers. In addition to new housing, capital projects reflect other factors that influence changes in membership and capacity, including the birth to kindergarten ratio and the migration or transfer of students.

In addition to changes in project status and funding, this CIP includes the following updated information:

- 1. All CIP program elements have been completed this year. Last year a five-year projection set was not produced as the possible future impact of the unique decline in membership. An assessment of facility capacity was not completed, and program capacity utilization was not calculated due to a virtual start to the school year, ongoing planning for a return to school with social distancing which required using all available rooms for core instruction.
- 2. The Resource section includes an inventory by school, of reflection rooms and private changing facilities that exist, are currently scheduled and planned for implementation.
- 3. FCPS is offering a virtual program in SY 2021-22 to provide virtual instruction to support students who have documented medical needs related to COVID-19. The large majority of students are learning in an in-person environment.
- 4. On February 4, 2021, FCSB approved a boundary adjustment between McLean HS and Langley HS, and between Longfellow MS and Cooper MS, beginning in SY 2021-22 to be implemented with the adopted phasing. On June 17, 2021, Fairfax County School Board (FCSB) approved a boundary adjustment between Bailey's ES, Bailey's Upper ES, Beech Tree ES, Belvedere ES, Glen Forest ES, Parklawn ES, and Sleepy Hollow ES, beginning in SY 2021-22 to be implemented with the adopted phasing.
- 5. Effective SY 2021-22, the administrative designation for Mason Crest ES was changed from the Annandale High School (HS) pyramid to the Falls Church HS pyramid. This does not change the Region assignment for Mason Crest Elementary School (ES).
- 6. Effective SY 2021-22, the City of Fairfax School Board approved to rename Lanier MS to Katherine Johnson MS and Fairfax County School Board (FCSB) approved to rename Mosby Woods ES to Mosaic ES.

The FY 2023-27 CIP Cash Flow identifies the current and anticipated funding for the following projects:

- New school construction of three elementary schools and one high school.
- Three new and/or repurposed school facilities.
- Construction of an addition at three high schools.
- Relocation of modular buildings.
- Renovation of 25 elementary schools, five middle schools, and three high schools.
- Acquisition of land for one new high school.

The renovation projects included in this CIP have been identified in accordance with the Renovation Queue, which was prepared and approved by the Fairfax County School Board (FCSB) in January of 2009. An independent architectural and engineering firm evaluated and ranked the order in which schools would be renovated. Due to anticipated demands upon available capacity, the construction of new capacity, whether a new school or an addition, could adversely impact the timing of renovation projects. To the extent known, any such delays are shown in the CIP.

Despite the planned additional capacity intended to address current and projected needs, uneven membership changes throughout the county along with the existing fiscal constraints will necessitate the continued consideration of boundary adjustments to take advantage of available capacity whenever it is practicable to do so. The identification of a boundary adjustment as a potential solution for a capacity deficit is for future consideration only. Any option(s) chosen for implementation will be discussed and decided through a transparent process with the City of Fairfax and Fairfax County communities, in accordance with each city and county School Boards' respective Policies and Regulations, as applicable.

In July 2019, the FCSB requested that an outside consultant work with the FCSB to identify best practices in boundary policy and to engage the community in the discussion. The original timeline of the boundary consultant contract has been delayed due to the COVID-19 pandemic, the planning for virtual learning, and the ongoing planning for a return to in-person instruction. FCPS has been working with the FCSB on a timeline to conduct community outreach related to the boundary consultant work. At this time, Superintendent Brabrand has made the decision that the only new boundary changes to be scheduled for FCPS will be those identified as priorities in the FY 2023-27 CIP.

For more information about facility needs, visit the capital improvement program webpage at www.fcps.edu/about-fcps/facilities-planning-future/capital-improvement-program.

OVERVIEW

OVERVIEW

The Fairfax County Public Schools (FCPS) Capital Improvement Program (CIP) is a planning and fiscal management tool used to coordinate the location, timing, and funding of projects over a five-year period. The CIP is updated annually to reflect changing conditions within our schools and communities. The program evaluates shifts in the total number of students relative to equitable access to all educational opportunities within the school district. Equitable access involves the distribution of programs and facilities throughout the division in response to changes in the demand for capacity within individual schools related to growth and/or programmatic needs.

The annual update to the CIP is intended to examine current student membership and facilities data to identify future capital needs for new construction, capacity enhancements, and facility renovations. The CIP approach includes the development of a five-year membership projection set, ongoing facility capacity evaluations, an annual update to the schedule of capital projects and funding, and a facilities management program. Each of these elements is essential to the CIP, which has become focused upon balancing a range of demands for capacity, the renovation schedule of school buildings, and effective facilities maintenance with a limited amount of available resources.

CURRENT OPERATING ENVIRONMENT

The growth of student membership over the past several decades and the unique program offerings of FCPS have resulted in a growing demand for additional capacity within school facilities and a corresponding increase in both capital and operational funding requirements. Current challenges affecting the fiscal mitigation of these increases include the need for new construction and capacity enhancements, a growing list of facilities entering the renovation cycle, instructional program requirements, and higher transportation costs.

Capital projects are funded by general obligation bonds through the Fairfax County Board of Supervisors, and current capital funding requirements outpace the current Fairfax County debt cap. Although the debt cap is necessary to maintain a high bond rating for Fairfax County, the annual cash flow of \$180 million for capital expenditures is insufficient to fund the capital requirements on the schedule of capital improvements.

Furthermore, fiscal constraints on operating budgets negatively affect the ability to maintain facility resources within recommended lifecycles. Deferred maintenance has a cumulative effect that becomes more difficult to overcome as resources are directed toward immediate concerns.

PROGRAM SUMMARY

The annual CIP reviews current student membership and facilities data to identify future capital requirements for new construction, capacity enhancements, facility renovations, and potential site acquisitions.

Capital requirements on the CIP schedule are explained as follows:

- New school construction projects are considered when significant capacity deficits are likely to persist over time. Although this is the costliest method of accommodating student growth, it is an important option when capacity needs cannot be met within a given area of the school system. An important component of new school construction is site acquisition.
- Capacity enhancements are defined as permanent methods for accommodating future needs and are completed for both program changes and in response to growth. Examples of project types include the construction of additions to existing schools or the installation of modular buildings.
- Facility renovations are aimed at ensuring that all schools provide the facilities necessary to support current educational programs, regardless of the age of the buildings. The current estimates based upon construction costs, available funding, and projected capacity requirements indicate that all schools within the queue will have funding for either planning or construction by the fall of 2027. It is likely that a new queue will need to be created in 2025.
- Potential sites are identified in areas where a new school will be needed as the result of anticipated residential development in the long-range planning timeframe.

PROGRAM ELEMENTS

The CIP utilizes the following elements to identify the capacity needs for future students and to determine the best strategies available to address those needs. The limitations in the current and possible future budgets are expected to remain, along with the urgency to address significant and continuing capacity deficits. A portion of capital spending is directed towards capacity enhancement for schools that are likely to experience continued pressures from high membership.

Development of a Five-Year Membership Projection Set

FCPS produces a five-year membership projection set after each school year begins. However, last year a five-year projection set was not produced because of the unique decrease in membership due to the

7

impact of the COVID-19 pandemic. The full effect of this decline cannot be known until additional data becomes available. The projection set is used for facilities planning and to update the schedule of capital projects included in the CIP for the next five-year planning period.

The projection methodology and correlated assumptions are sensitive to dynamic and complex variables including economic, demographic, and urban development trends. Projections are developed through a process that begins with a data update at the individual school level, high school pyramid level, region level, and district level.

An annual Membership Trends Report is produced to review these trends and patterns in student membership within the school division. The report includes summary data tables that compare the current and prior year membership, births, migration, and transfer conditions for the school district and by school level (elementary, middle, and high). The report for School Year (SY) 2021-22 included SY 2019-20 as a reference to compare membership prior to the COVID-19 pandemic. Understanding membership changes is essential to the planning process, as the changes form the basis for additional capital planning and construction recommendations. The following steps describe the actions taken by the Office of Facilities Planning Services to determine capacity needs:

Step 1: Each September, the school facility floor plans are analyzed to determine the current capacity utilization for each school facility as it accommodates program needs. School facility capacity surpluses and deficits for the current school year are identified. Each October, the overall school system membership projection set for a five-year period is developed. The projection set is used in forecasting student membership trends and future requirements and recommendations of the CIP.

Step 2: Projected membership and capacities are compared. School facility capacity surpluses and deficits for the projected are identified.

Step 3: Recommended solutions to the capacity imbalances are developed and evaluated for both short-term and long-term accommodation needs.

Monitoring Membership Impacts from New Housing

The Office of Facilities Planning Services coordinates with the Fairfax County government to determine the potential impacts of proposed residential development on school facility capacity. A school impact analysis, including estimated student yields generated by the planned and proposed development, is provided to the Fairfax County government and the appropriate Fairfax County School Board (FCSB) members. In addition, recommendations are provided to address future school facilities needs in relation to Fairfax County long-range planning initiatives and comprehensive plan studies. Long-range planning initiatives and comprehensive plan studies. Long-range planning initiatives and comprehensive plan studies are often the first step toward the construction of additional residential units above the number currently anticipated in these areas.

Staff conduct field verification of residential development as it occurs within each school boundary to track the construction status. Field verification allows staff to gain insight into changes within an individual school community and also provides a better understanding as to when and where additional students might impact nearby school capacity as a result of new housing units. To view information on Fairfax County residential development applications that have been reviewed by Fairfax County Public Schools staff, refer to the Residential Development Applications Dashboard at https://www.fcps.edu/about-fcps/planning-future/development-review-and-proffer-processes.

Assessment of Facility Capacity

Understanding and accurately capturing school capacity is imperative to:

- Ensure the most efficient use of school facilities and capital funds.
- Assess appropriate program placement.
- Develop student accommodation solutions.
- Ensure that classroom spaces are sized appropriately and designed with flexibility to meet the needs of multiple and/or changing instructional programs.
- Formulate long-term facility plans.

School capacity is measured differently depending upon the school level - elementary school (ES), middle school (MS), and high school (HS). ES capacity is calculated based on the number of core classrooms and self-contained special education classrooms. MS capacity calculations differ depending on whether the learning environment is a team-taught model, which limits the number of students to the quantity of rooms required to support a team, or the departmental teaching model, where the assessment is similar to the HS level. HS capacity calculations are more complex and based on the required core programs and the various elective options available.

The evaluation of how each school utilizes space is essential to formulating a methodology that assesses capacity for elementary, middle, and high schools. The Office of Facilities Planning Services includes staff who perform the assessment comparisons between membership and capacity at the division, region, high school pyramid, and individual school level. The Capacity section of this document, beginning on page 81, provides detailed information for current and projected capacity assessment and utilization. To view information on school capacity terminology and methodology, refer to the Facilities and Membership Dashboards at www.fcps.edu/membershipdashboards.

Schedule of Capital Projects and Funding

The capacity assessment can identify deficits that cannot be addressed through lower-cost methods such as school boundary changes, program relocations, trailer installation, or interior building modifications designed to recapture underutilized or unused capacity. In these cases, deficits are proposed to be resolved through the CIP capital project schedule, which, along with supporting documentation, comprises a "statement of need." The current schedule can be found on page 40 of this document.

The Office of Design and Construction Services is responsible for the acquisition of school sites, the design and construction of new school facilities (including additions made to existing schools), and the renovation of existing school facilities in accordance with approved educational specifications. Currently, the office is:

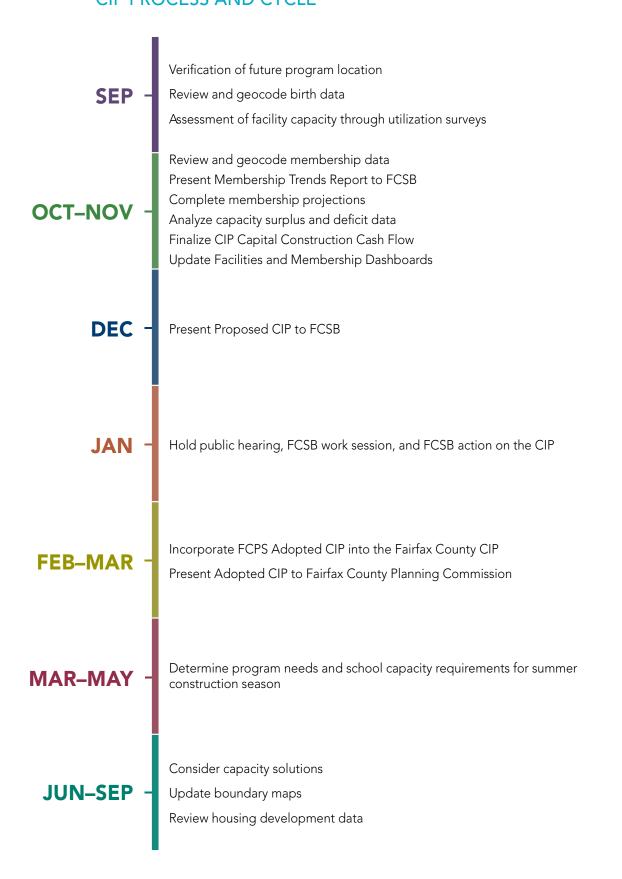

- Implementing projects contained in the 2015, 2017, 2019, and 2021 School Bond Referenda.
- Managing the funding provided for temporary classrooms and for facility modifications that is transferred from the School Operating Fund.
- Providing equipment for new schools, additions to existing schools, and renovations of existing facilities via funding from approved bond sales and a transfer from the School Operating Fund.

Facilities Management Program

The Office of Facilities Management is responsible for routine preventive and corrective building and grounds maintenance services, facilities infrastructure repair and replacement, and energy conservation in the design and operation of FCPS facilities. The facilities management program provides additional protection for FCPS capital investments. The preventive approach helps to minimize the need for premature replacement of costly elements. Ongoing funding of major infrastructure maintenance projects helps to prevent the failure of critical systems, deterioration of major capital investments, and significant health and safety hazards. Although all facilities management related cost is funded through the operating budget, the program has an integral relationship with capital expenditures as it impacts the funding available for capacity projects.

9

CIP PROCESS AND CYCLE

11

REGULATION

REGULATORY FRAMEWORK

The Fairfax County Public Schools (FCPS) Capital Improvement Program (CIP) operates within a regulatory framework that has been established at the national, state, county, and division level by multiple departments, agencies, officials, planning documents, guidelines, and policies. Education is primarily a state and local responsibility in the United States; however, the passage of the Elementary and Secondary Education Act of 1965 has continued to guide states and local school systems throughout the country, with the most-recent reauthorization in 2015. The Laws of the Commonwealth of Virginia mandate a free public elementary and secondary school system, administered by the Virginia Board of Education (VBOE), the Superintendent of Public Instruction (SPI), local school division superintendents, and school boards.

COMMONWEALTH OF VIRGINIA

The Virginia Department of the Treasury incorporates several boards and authorities including the Virginia Public School Authority. The authority consists of the State Treasurer; the State Comptroller; the SPI; and five additional members who are appointed by the Governor, subject to confirmation by the General Assembly of Virginia. The General Assembly convenes in January of each year and approved legislation becomes effective in July of the same year, unless otherwise indicated. Any information concerning actions to be taken by local school boards is included in a summary of each bill that is tracked by the Virginia Department of Education. The department is the administrative agency for the commonwealth's public schools, with the SPI leading the external functions of the agency, as well as managing internal operations. The Division of Budget, Finance, and Operations, which is part of the leadership team under the direction of the SPI, is responsible for distributing state and federal funds to school divisions and providing technical assistance to local school divisions in the area of school facilities, among others.

Virginia Law requires the VBOE to prescribe Standards of Quality (SOQ) for public schools. The SOQ serves as the foundation program and are reviewed approximately every two years. There are 10 SOQ, five of which are the most applicable to the facilities planning program:

- Instructional programs supporting the Standards of Learning and other educational objectives.
- Instructional, administrative, and support personnel.
- Quality of classroom instruction and educational leadership.
- Planning and public involvement.
- School Board policies.

The Board of Education Comprehensive Plan is developed with statewide participation at the local level and identifies the objectives and strategies for public education in Virginia, including strategies for the management of facilities capacity in relation to changes in membership. It is reviewed biennially and revised as necessary. The Board of Education Comprehensive Plan: 2018-2023 provides the framework for the leadership of the VBOE, its advocacy, and oversight to prioritize and meet the future needs and goals of students, educators, and schools. The following priorities are outlined in the plan:

- Priority 1: Provide high-quality, effective learning environments for all students.
- Priority 2: Advance policies that increase the number of candidates entering the teaching profession and encourage and support the recruitment, development, and retention of wellprepared and skilled teachers and school leaders.
- Priority 3: Ensure successful implementation of the Profile of a Virginia Graduate and the accountability system for school quality as embodied in the revisions to the Standards of Accreditation.

FAIRFAX COUNTY BOARD OF SUPERVISORS

Although the General Assembly regulates the establishment and administration of public schools throughout the Commonwealth, the fiscal management of programs and facilities is the responsibility of local governments and school divisions, as most recently reaffirmed in January of 2019 by the Office of the Attorney General:

"While the Virginia Constitution establishes education as a fundamental right, it places the responsibility for funding the required educational program on the General Assembly. The General Assembly has elected to require localities to provide the majority amount of funding for construction and improvement of public schools."

The Fairfax County School Board (FCSB) submits budget requirements, including the schedule of capital projects identified in the CIP, to the Fairfax County Board of Supervisors (FCBOS) annually, along with all other county departments and divisions. The FCBOS then prepares and approves a budget for all contemplated expenditures, estimated revenues, and borrowings for the ensuing fiscal year and fixes a tax rate accordingly. During this process, the FCBOS makes appropriations to the FCSB from the funds derived for operation, capital outlay, and debt service. The funding is required to be equal to or greater than the cost apportioned to the governing body for maintaining an educational program meeting the VBOE SOQ. A formula is used to determine the percentage of cost that must be funded locally. The formula and funding process is described in the Funding section of this document, beginning on page 21.

FAIRFAX COUNTY SCHOOL DIVISION

The supervision of schools within each school division is vested in a school board, and for each school division there is a division superintendent of schools appointed. The FCSB, consisting of elected officials who serve four-year terms, holds the following duties relative to facilities planning, as stated in the Code of Virginia § 22.1-79.

- Care for, manage and control the property of the school division and provide for the erecting, furnishing, equipping, and noninstructional operating of necessary school buildings and appurtenances and the maintenance thereof by purchase, lease, or other contracts.
- Provide for the consolidation of schools or redistricting of school boundaries or adopt pupil assignment plans whenever such procedure will contribute to the efficiency of the school division.
- Obtain public comment through a public hearing not less than 10 days after reasonable notice to the public in a newspaper of general circulation in the school division prior to providing:
 - i. for the consolidation of schools;
 - ii. the transfer from the public school system of the administration of all instructional services for any public school classroom or all noninstructional services in the school division pursuant to a contract with any private entity or organization; or
 - iii. in school divisions having 15,000 pupils or more in average daily membership, for redistricting of school boundaries or adopting any pupil assignment plan affecting the assignment of 15 percent or more of the pupils in average daily membership in the affected school.

Every two years, the FCSB adopts a Divisionwide Comprehensive Plan (DWCP) that is consistent with, and is included within, the Board of Education Comprehensive Plan. A report is presented by the FCSB to the public by November 1 of each odd-numbered year describing the extent to which the objectives of the DWCP have been met during the previous two school years. The DWCP is required to include, among other topics:

- A forecast of membership changes.
- A plan for projecting and managing membership changes including consideration of the consolidation of schools to provide for more comprehensive and effective delivery of instructional services to students and economies in school operations.

The Facilities Planning Advisory Council (FPAC) was established in September of 2010 to "advise and inform the staff and School Board in the development of comprehensive, long-term plans for facilities needs in the most effective and efficient way." An annual report is submitted to the FCSB which includes recommendations to aid in future facilities planning efforts.

FPAC recommendations have been made over time and have been incorporated into an ongoing improvement process moving toward a more comprehensive facilities planning program that includes multiple solutions in addition to traditional capital investment.

The FPAC SY 2021–22 charges that are being addressed in the FY 2023–27 CIP are:

- Continue to develop the long-range vision for FCPS school facilities.
- Provide further support to facilitate implementation of the accepted FPAC major maintenance and asset management recommendations.
- Further develop recommendations on facility resiliency, to include accessibility, sustainability, and design justice.
- Advise and assist with the development and implementation of updated boundary policies and processes and identify any immediate capacity needs at specific schools.
- Assess and evaluate how facility design and construction can become more functional within the classroom walls, incorporate greater use of outdoor space, and enhance ventilation.

The superintendent performs duties as prescribed by law, by the FCSB, and by the VBOE, including the preparation of budget requirements, the presentation of a divisionwide ratio of students in average daily membership to full-time equivalent teaching positions, and the identification of critical shortages of teachers and administrative personnel.

It is important to maintain strong, connected school communities and community/neighborhood schools that are safe and conducive to learning for all students. The FCSB has established the following list of guiding principles, created over time, to direct certain outcomes in facilities planning and to provide a context for decisions impacting the division's capital needs so that limited capital resources and supporting quality educational spaces are maximized. Each school and school community has unique needs, thus these statements may not be applicable or appropriate in all circumstances.

- Unique program offerings should be made available in all division pyramids in order to keep students within their zoned pyramid throughout their K-12 experience, where conditions are conducive to program needs.
- Attendance islands will be alleviated.
- Utilize existing and/or projected surplus capacity in nearby schools by adjusting boundaries in order to address overcrowding in some schools.
- Add additional capacity to stated division standards when renovating small schools.
- Repurpose existing inventory of school facilities not currently being used as schools to address capacity challenges.
- Construct new schools only where surplus capacity or existing school inventory are not available in order to maximize limited capital monies.
- Community engagement and transparency are essential parts of the process. With any major capital improvement project, the community impacted by the project will be actively engaged as per FCSB policies and regulations.
- FCPS is committed to continue to take innovative and cost-effective steps to help our country achieve climate stabilization. That includes prioritization of systems and practices that maximize energy efficiency and provide for the cost-effective transition to clean and renewable alternatives to fossil fuels.

FCPS maintains policies, regulations, and notices that guide expectations related to the CIP. Policies are officially adopted FCSB positions and specifications; regulations are procedures and rules for the implementation of policy positions and guidelines that are approved by the division superintendent or designee; and notices contain information about yearly or one-time occurrences of short duration. Notices are approved by the division superintendent or designee and are reissued, not revised. **Table 1** and **Table 2** identify policies and regulations that are specific to facilities planning or that influence facilities planning.

Table 1

Policies and Regulations, Facilities and Transportation Services (FTS)

NUMBER	SERIES	CATEGORY / TITLE	PURPOSE
Policy 8110	FTS	Facilities Planning Five-Year Capital Improvement Program Planning	To establish procedures for five-year capital improvement program planning.
Regulation 8110	FTS	Facilities Planning Five-Year Capital Improvement Program Planning	To establish responsibilities and the calendar for capital improvement program (CIP) planning.
Policy 8120	FTS	Facilities Design and Construction School Planning	To prescribe steps to be followed in school planning.
Regulation 8120	FTS	Facilities Design and Construction Educational Specifications	To designate the groups responsible for the development of educational specifications for school buildings.
Policy 8130	FTS	Facilities Planning Local School Boundaries, Program Assignments, and School Closings	To describe the authority of the School Board to determine the assignment of students to schools and programs, to close schools and programs where appropriate, and to define the considerations and procedures for such determinations.
Regulation 8130	FTS	Facilities Planning Local School Boundaries, Program Assignments, and School Closings	To provide specific guidance for implementing the current version of Policy 8130, Local School Boundaries, Program Assignments, and School Closings.
Policy 8170	FTS	Facilities Planning Naming School Facilities and Dedicating Areas of School Facilities or Grounds	To establish guidelines for the naming of school facilities and the permanent dedication or naming of areas of school facilities or grounds to honor individuals or for assigning naming rights for portions of school facilities in order to recognize private or corporate entities that make a significant contribution to benefit Fairfax County Public Schools.
Regulation 8170	FTS	Facilities Planning Procedure for Naming School Facilities and Dedicating Areas of School Facilities or Grounds	To provide procedures for naming and renaming school facilities and for dedicating areas of school facilities or grounds.
Policy 8210	FTS	Facilities Design and Construction Management Responsibility— Capital Improvements	To establish management responsibility for capital improvements.
Policy 8230	FTS	Facilities Design and Construction School Design	To establish procedure to be followed for school design.
Regulation 8230	FTS	Facilities Design and Construction School Design—Guidelines	To establish guidelines to be followed with regard to school design.

[continued on next page]

Policies and Regulations, Facilities and Transportation Services (Cont.)

NUMBER	SERIES	CATEGORY / TITLE	PURPOSE
Policy 8258	FTS	Facilities Design and Construction Building Evaluation, Building Renovation, and Infrastructure Maintenance	To establish goals and procedures for building evaluation, building renovation, and infrastructure maintenance of school facilities and other School Board-owned buildings.
Regulation 8260	FTS	Facilities Design and Construction Building Evaluation and Renovation	To provide procedures for the evaluation and renovation of buildings.
Regulation 8270	FTS	Facilities Design and Construction Capital Outlay and Facilities Improvements	To prescribe procedures to be followed by a program manager to initiate additions to, or changes to, existing school buildings and grounds.
Policy 8310	FTS	Facilities Design and Construction Site Planning and Development	To establish procedures for site planning and development.
Policy 8320	FTS	Facilities Design and Construction Site and Building Acquisition	To establish a policy for school and building site acquisition.
Regulation 8320	FTS	Facilities Design and Construction Site Acquisition—Procedures	To establish procedures for site and building acquisition.
Policy 8410	FTS	Leasing and Community Use of Facilities Leasing of School Facilities	To encourage efficient and cost-effective use of space in school facilities and the use of grounds through leasing of space temporarily in excess of school needs.
Policy 8420	FTS	Leasing and Community Use of Facilities Community Use of School Facilities	To encourage the use of school buildings and grounds by the community for educational, recreational, civic, and cultural activities to the extent possible under the law and consistent with school operations.
Regulation 8420	FTS	Leasing and Community Use Section Community Use of School Facilities	To establish the procedures and determine the conditions for community use of Fairfax County Public Schools (FCPS) buildings and grounds.
Regulation 8534	FTS	Facilities Management Energy Conservation Measures	To minimize facilities operation expenses by conserving energy.
Policy 8542	FTS	Facilities and Transportation Services Environmental Stewardship	To prioritize the practices to be developed and implemented by staff members in order to address global warming and to meet other important environmental initiatives.
Policy 8560	FTS	Facilities Management Maintenance of Physical Facilities	To assign responsibilities for the maintenance of school buildings and systems.
Policy 8561	FTS	Leasing and Community Use of Facilities Child Care Services	To establish criteria for the use of School Board facilities by child care programs sponsored by the county or other public agencies.

Table 2

Policies and Regulations Related to Facilities Planning

NUMBER	SERIES	CATEGORY AND TITLE	PURPOSE
Policy 2201	Special Services	Admissions, Residency, and Attendance Compulsory Attendance Requirements	To set policy regarding compulsory school attendance pursuant to Code of Virginia requirements.
Policy 2202	Special Services	Admissions, Residency, and Attendance Eligibility for Enrollment	To establish the eligibility requirements for enrollment in Fairfax County Public Schools (FCPS).
Regulation 2202	Special Services	Admissions, Residency, and Attendance Required Admission Credentials for Students	To establish the admission credentials required for students entering Fairfax County Public Schools (FCPS) for the first time.
Regulation 2204	Special Services	Admissions, Residency, and Attendance Admission Requirements - Determination of Eligibility for Admission	To establish procedures for the enrollment of all nontuition-paying and tuition-paying students.
Regulation 2205	Special Services	Admissions, Residency, and Attendance Enrollment of Homeless Students	To provide procedures for the identification and enrollment in school of homeless students so as to maintain a stable educational environment by minimizing the effect of mobility on academic achievement.
Regulation 2212	Special Services	Admissions, Residency, and Attendance Enrollment of Students in Foster Care	To provide procedures for the identification and enrollment in school of students in foster care so as to maintain a stable educational environment by minimizing the effect of mobility on academic achievement.
Policy 2220	Special Services	Admissions, Residency, and Attendance Admissions of Postgraduate Students	To establish policy regarding admission of postgraduate students.
Regulation 2220	Special Services	Admissions, Residency, and Attendance Admission of Postgraduate Students	To establish rules and procedures for the enrollment of postgraduate students in a regular high school program.
Regulation 2230	Special Services	Admissions, Residency, and Attendance Student Transfer Process	To define procedures for considering student transfer requests for school-age (K-12) students to attend schools other than their base schools.
Policy 3335	Instruction	Special Programs	To establish policy for advanced academic programs, grades K-12.
Regulation 3333	Instruction	Special Programs and Services Location Guidelines	To outline procedures to be followed when relocating or establishing new or existing programs and services, including special education, Advanced Academic Programs (AAP), Family and Early Childhood Education program (FECEP) and Head Start and English for Speakers of Other Languages (ESOL).

Source: FCPS, School Board Policies and Regulations.

ESSENTIAL PLANNING DOCUMENTS

The following key documents are interrelated and create the foundation for the facilities planning program of FCPS.

Virginia Department of Education (VDOE) Standards of Quality (SOQ)

Virginia Law requires that the VDOE prescribe SOQ for public schools, which are reviewed approximately every two years and can be found in Title 22.1, Chapter 13.2 of the Code of Virginia. The SOQ are the requirements that must be met by all Virginia public schools and school divisions.

VDOE Profile of a Virginia Graduate

The Profile of a Virginia Graduate provides the framework for the requirements students must meet to earn a Standard Diploma or an Advanced Studies Diploma from a public high school in Virginia. In developing the profile, the Board of Education determined that a life-ready Virginia graduate must:

- Achieve and apply appropriate academic and technical knowledge (content knowledge).
- Demonstrate productive workplace skills, gualities, and behaviors (workplace skills).
- Build connections and value interactions with others as a responsible and responsive citizen (community engagement and civic responsibility).
- Align knowledge, skills, and personal interests with career opportunities (career exploration).

Fairfax County Comprehensive Plan (FCCP)

The FCCP guides county government in decision-making about the built and natural environment. It is a dynamic document that is utilized by the Fairfax County Board of Supervisors (FCBOS), the Planning Commission, county staff, and the public to quide land use, transportation, and public facility decisionmaking. Based on the information it provides, Fairfax County and FCPS consider the effect of future development on the school system.

Fairfax County Capital Improvement Program (CIP)

The Fairfax County CIP is a five-year roadmap for creating, maintaining, and funding present and future capital infrastructure requirements and includes capital projects in the FCPS CIP. The CIP serves as a planning instrument to identify needed capital projects and coordinate the financing and timing of improvements. The CIP provides the framework for the Fairfax County Executive and the FCBOS for managing bond sales, investment planning, and project planning. Fairfax County's CIP also includes a future outlook with a glance at the potential long-term requirements beyond the current five-year period.

Joint Committee on Infrastructure Financing Report, February 18, 2014

The Infrastructure Financing Committee (IFC), a joint committee between the FCSB and the FCBOS, was established in April 2013 as a working group to collaborate and review both the Fairfax County and the FCPS Capital Improvement Program (CIP) and relative capital requirements. The IFC provided a final report to the FCBOS and FCSB containing recommendations to address the capital challenges related to facilities management. The report included statements of support for:

- Conducting capital needs assessments.
- New policy recommendations for capital financing, which includes the establishment of a capital sinking fund and a supported annual increase to the General Fund.
- The adoption of common definitions related to all types of maintenance.
- Encouragement of the identification of joint use opportunities for facilities.
- Continued evaluation of approaches to further reduce capital costs.

Joint Environmental Task Force Report, October 1, 2020

The Joint Environmental Task Force (JET), a collaboration between the FCSB and the FCBOS, was established in April of 2019 to further the efforts toward energy efficiency and environmental sustainability. The JET provided a final report containing recommendations for areas of cooperation and measurable goals:

- Commitment to energy carbon neutrality by 2040.
- Aspiration to be at zero waste by 2030.
- Facilitation of the knowledge and pursuit of "green" career paths for students and adult learners.
- Transition of bus fleet and other vehicles to electric alternatives by 2035.

Fairfax County School Board (FCSB) Strategic Governance Manual (SGM)

The SGM outlines the governing process by which the FCSB is to fulfill its obligations in a manner that allows for the freedom and authority to do its work, but it also has full accountability for the results of its decisions.

FCPS Divisionwide Comprehensive Plan (DWCP)

Standard 6 of the VDOE SOQ for public schools in Virginia requires that local school boards biennially adopt a DWCP. The purpose of the plan is to provide a platform for communicating major divisionwide initiatives and operational plans. The current DWCP consists of FCSB strategic plan goals that are aligned with the operational plans of the system. The strategic plan goals are reviewed and assessed annually. A report on the progress made in each area is prepared and disseminated as part of the divisionwide continuous improvement cycle.

FCPS Strategic Plan: Ignite

The plan represents the cooperative work of the FCSB and the Leadership Team to create a long-term vision for FCPS and is focused around four goals:

- 1. Student Success: to reach, challenge, and prepare every student for success in school and life.
- 2. Caring Culture: to foster a responsive, caring, and inclusive culture where all feel valued, supported, and hopeful.
- 3. Premier Workforce: to invest in our employees, encourage innovation, and celebrate success.
- 4. Resource Stewardship: to champion the needs of our school communities and be responsible stewards of the public's investment.

Each goal represents a building block to ensure that all students leave high school able to demonstrate the attributes of Portrait of a Graduate.

Portrait of a Graduate (POG)

POG implements the VDOE framework for the requirements students must meet to earn a Standard Diploma or an Advanced Studies Diploma. The FCPS graduate will engage in the lifelong pursuit of academic knowledge and interdisciplinary learning by being a communicator, a collaborator, an ethical and global citizen, a creative and critical thinker, and a goal-directed and resilient individual.

FCPS Adopted Budget

The budget process begins in January of each year with the Superintendent's Proposed Budget, which details projected revenue and expenditures. The FCSB then holds public hearings, which could lead to revisions. The FCSB Advertised Budget is then submitted to the FCBOS for incorporation into the county budget. Once revenue for the coming year is determined, including the amount of direct funding from the county, the FCSB coordinates with staff and citizens to finalize the budget, which is then adopted in May of each year and identifies the revenue and expenditures for the next fiscal year.

Facilities Planning Advisory Council (FPAC) Annual Report

FPAC provides an annual report to the FCSB containing significant findings and recommendations related to its annual charge from the School Board. The report includes details explaining the background and reasoning underlying the recommendations.

FCPS Membership Trends Report

The Membership Trends Report informs the capacity evaluations that are part of the CIP. The report includes summary data tables comparing the current year to the prior year with regard to membership, birth rate, migration, and transfer conditions for the school district as a whole and by school level (elementary, middle, and high), region, high school pyramid, and by individual school. Understanding the annual changes in membership is essential to the annual planning process, as any changes form the basis for additional capital planning and construction recommendations.

FCPS CIP

The FCPS CIP identifies the capital projects to be submitted to the FCBOS for inclusion both in the county CIP and as part of the bond referenda periodically placed before the voters of Fairfax County. The primary source of funding for school construction projects is the sale of bonds authorized by the voters in these referenda. The CIP is updated annually and contains a five-year forecast.

21

FUNDING

FUNDING

The Laws of Virginia regulate the institution and administration of public schools throughout the Commonwealth; however, the fiscal management of programs and facilities is the responsibility of local governments and school divisions. The proportion of state and local funding is determined every two years by the Virginia Department of Education, utilizing an established formula of algorithms based upon student membership and program requirements, in addition to several economic indicators.

The primary local source of funding for the Fairfax County government is real estate and personal property tax dollars. Additionally, the county has used the sale of general obligation bonds to fund capital improvement projects, which has enabled the fiscal impact to be spread over the many years that the facilities are used. Voter approval authorizes the Fairfax County Board of Supervisors (FCBOS) to sell bonds, when needed, to generate the funds for a range of public facilities, including schools. The most recent School Bond Referendum was approved by county residents in November 2021.

The General Assembly of Virginia has elected to require localities to provide the majority amount of funding for the construction and improvement of public schools and a formula is utilized to determine the specific proportion annually. Virginia utilizes a foundation program formula to determine basic program funding, taking the average daily membership multiplied by the per student cost. The basic program cost is that which provides the minimum instructional and support staff required to fulfill the Virginia Board of Education Standards of Quality (SOQ) in addition to accreditation requirements. The divisionwide per student cost is determined annually using a methodology agreed on by the Washington Area Boards of Education (WABE), of which the Fairfax County School Board (FCSB) is a member. The WABE comprises of 11 participating school divisions, including City of Fairfax, and the comparative cost per pupil is calculated by 10 participating school divisions after approved budgets are finalized in the spring of each year.

The Local Composite Index (LCI) of Local Ability-to-pay determines how much the General Assembly will contribute to support the efforts of each school division to provide the basic program requirements. The index merges two economic indicators: adjusted gross income and taxable retail sales receipts with the assessed value of homes and other property within each local jurisdiction. This provides the potential tax revenue able to be raised in a given year toward the local portion of per student cost. A larger percentage, or LCI number, is assigned to those divisions in areas that have a greater ability to pay. The most current LCI reflected in the FCPS FY 2021 Approved Budget was established in the fall of FY 2019 for the years of FY 2021 and FY 2022. Fairfax County has an LCI of .6541 meaning that for these years, the proportion of funding would reflect approximately 65 percent local and 35 percent state sources for basic program cost.

The state and local proportionate funding for schools is managed through the annual budgeting process. The FCSB, along with all other county departments and divisions, submits budget requirements, including the schedule of capital projects on page 40 of this document, to the FCBOS. The FCSB also provides notification of the estimated average per pupil cost for public education in the school division for the coming school year, in accordance with the budget estimates provided. The FY 2022 cost per pupil, as identified in the FCPS FY 2022 Approved Budget, is \$18,118. This amount changes every year and is the basis for the recommended per student cash contribution requested by FCPS when development applications are submitted to the county that will increase school membership. The impact of new development is discussed in further detail in the Factors that Influence Student Membership section of this document, beginning on page 25.

The FCBOS prepares a budget containing all contemplated expenditures, revenues, and borrowings and then fixes a corresponding tax rate for the budget year. During this process, the FCBOS makes appropriations to the FCSB for budgetary needs. The funding allocation must be equal to or greater than the portion designated by the General Assembly for maintaining an educational program meeting the SOQ. The FCPS FY 2022 Approved Budget states that the total funding sources of revenue consist of 64.3 percent local, 23.1 percent state, and 12.5 percent all other sources, including federal funds.

SOURCES

The FCPS Operating Budget consists of multiple funds, including the Governmental Funds category. This category contains the Operating, Capital Projects, and Special Revenue Funds. The FCPS Capital Projects Fund tracks financial transactions used for the acquisition, new construction, or renovation of school sites, buildings, and other major capital improvements. All construction projects are budgeted in the Construction Fund, which is a subset of the Capital Projects Fund, and is primarily funded from the sale of general obligation bonds by the county. Additional funding sources include transfers from the Operating Fund and from the Fairfax County Capital Projects Fund, as well as from the City of Fairfax and Thomas Jefferson HS tuition that has been allocated for capital cost.

General Obligation Bonds

Responsible management of debt allows the county to leverage the bond market to facilitate the delivery of capital projects and infrastructure for the community while holding down the cost of debt to avoid impacts on other programs and services. To ensure that the county bond rating is not jeopardized, the FCBOS adheres to financial management principles that set limits on the annual cost of the county's debt service and net long-term debt. It should be noted, however, that the bond spending cap for FCPS of \$180 million per year has limited the availability of funding to accomplish school facility needs, especially the elimination of temporary classrooms, the reduction of the current 37-year renovation cycle to the desired 20 to 25 years, and the mitigation of schools that are over capacity.

The FCPS CIP is the basis for determining the timing and scope of proposed bond referenda related to schools funding. Actual bond sales are based upon the review of funding requirements prior to each sale in addition to the condition of the bond market. Every two years, in November, school capital facility projects are part of a school bond referendum, which is added to the general election ballot. Actual start and completion dates for CIP projects depend on the Capital Construction Cash Flow and debt service limitations established by the FCBOS. The timeline for capital projects can range from five to seven years or more from the time of approval to completion because of the spending limitation of \$180 million each year. Bond revenue is used for new construction, capacity enhancements, renovations, special program facilities, and site acquisition.

Fund Transfers

The Operating and Capital Projects Funds are interrelated in that funds are transferred to the Capital Projects Fund from the Operating Fund. As described in the FCPS FY 2022 Approved Budget, equipment funding for new construction, renewals, and additions is provided through a transfer from the school Operating Fund to the Construction Fund to cover one-third of the cost to equip new school construction, school renovations, and school additions. Bond funds are used to fund the remaining two-thirds of the equipment funding needs.

The transfers from the Fairfax County Capital Projects Fund include funds related to both the recommendations of the Synthetic Turf Field Taskforce (FY 2013) and the Infrastructure Financing Committee (FY 2014). As a result of the Infrastructure Financing Committee, the county has provided an annual transfer of \$13.1 million to the Construction Fund for capital replacement and upgrade requirements, freeing general obligation bond funding for large replacement or new capacity requirements. In FY 2019, the county transferred a one-time additional \$2.5 million, for a total of \$15.6 million.

Residential land development in Fairfax County has a considerable impact upon the ability of schools to accommodate students. Changes in membership from year-to-year fiscally impact the school division by requiring capital investment in new construction to adjust the number of students participating in core instruction, as well as various other programs. The Laws of Virginia allow for local governments to continue to approve new development while offsetting the impacts to public facilities in the form of proffers, collected by the local government. Proffers are voluntary conditions agreed upon by the applicant at the time approval is requested of a land use that would result in such impacts. Proffers can address both onsite and offsite impacts, and once accepted, they become a part of the zoning regulations applicable to the property, unless subsequently changed by a development plan amendment or by a new zoning map amendment. Proffers are then allocated to projects related to increasing the capacity of affected schools, after being transferred to the FCSB from the FCBOS. Additional detail about the potential impacts of new development is provided in the Factors section of this document, beginning on page 25.

Table 1 describes the remaining identified funding sources for the Construction Fund, from which the CIP is partially funded. No proffer funds were allocated to FCPS capital projects in FY 2021.

Table 1

Additional Funding Sources

SOURCE	DESCRIPTION
City of Fairfax	FCPS operates the schools owned by the City of Fairfax. The School Services Agreement between the City of Fairfax and FCPS determines the tuition due to FCPS from the City of Fairfax for educating city students based upon on a projected average daily membership (ADM).
Thomas Jefferson HS Tuition (allocated to capital cost)	FCPS receives tuition for students who reside outside of Fairfax County, including students from neighboring school divisions who attend Thomas Jefferson HS.

25

FACTORS

FACTORS THAT INFLUENCE STUDENT MEMBERSHIP

Divisionwide student membership is influenced by demographic changes from year to year and the trends that result over time. These trends are influenced by the birth to kindergarten membership ratio, migration of students into and out of the school division, total population trends, housing unit inventory by type, and new residential development in the county. Additionally, boundary adjustments and program changes, as well as the transfer of students within the school division, affect student membership and projections at the individual school level.

Three primary factors that impact student membership are presented in this section to aid in the evaluation of the change in total membership: 1) the birth to kindergarten ratio, 2) the migration of students into and out of the school division, and 3) the transfer of students from their base schools to other schools within the division, including students who transfer in from outside the school division. The COVID-19 pandemic has had an impact on FCPS membership in the last two school years. Whether these trends are temporary will depend on many factors, including the future course of the pandemic and economic conditions.

26

Total membership decreased by 1,556 students from 180,151 in SY 2020-21 to 178,595 students in SY 2021-22, which includes 178,210 students in-person and 385 students within the virtual program. Combined with the SY 2020-21 decrease of 8,859 students, there has been a total decrease of 10,415 students since SY 2019-20. Total elementary school (ES) level membership decreased by 477 students. Combined with the SY 2020-21 decrease of 7,781, there has been a total decrease of 8,358 ES students since SY 2019-20. Total middle school (MS) level membership decreased by 977 students. Combined with the SY 2020-21 decrease of 246, there has been a total decrease of 1,223 MS students since SY 2019-20. Total high school (HS) level membership decreased by 102 students. Combined with the SY 2020-21 decrease of 732, there has been a total decrease of 834 HS students since SY 2019-20. To view additional information on these data points refer to the Facilities and Membership Dashboards at www.fcps.edu/membershipdashboards.

HISTORICAL AND CURRENT KINDERGARTEN MEMBERSHIP

The birth to kindergarten ratio, shown in Figure 1, results from a comparison between the number of births at a point in time and the kindergarten student membership five to six years later. Students are eligible for kindergarten when they have turned five years old prior to September 30 of any given school year. Consequently, the timeframe between birth to kindergarten can be between five and six years. The kindergarten membership increased by 1,186 students from 10,895 in SY 2020-21 to 12,081 in SY 2021-22 and births decreased by 118 from 14,433 in BY 2014-15 to 14,315 in BY 2015-16. This resulted in an increase in the birth to kindergarten ratio from 75% in SY 2020-21 to 84% in SY 2021-22. Combined with the SY 2020-21 decrease of 2,208, there has been a total decrease of 1,022 kindergarten students since SY 2019-20 membership.

Historical, Current, and Projected Kindergarten Membership Compared to Births SY 2012-13 to SY 2026-27

* Projected

Sources

FCPS, Certified Membership, September 2012 to September 2021.

FCPS, Membership Projections, Fall 2021 2.

Virginia Department of Health Division of Health Statistics, Vital Records and Health Statistics, 2006 to 2020.

Notes:

Membership includes general education, special education, special education centers, multi-agency, and home school and private school special education services

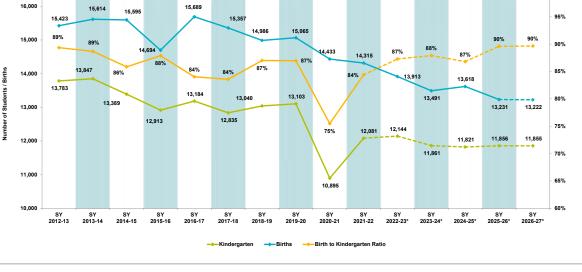

Membership includes students who attend an FCPS school and reside outside Fairfax County and the City of Fairfax. 2

3.

Birth numbers only includes births by mothers who reside in Fairfax County or City of Fairfax Births for SY 2026-27 are projected due to not being available. 4.

The impacts of COVID-19 are uncertain and may affect the accuracy of the student membership projections.

Dates for student membership projections and official budget counts are based on special education and special education preschool (December 1), nontraditional sites (January 31), and FCPS PreK (March 31).

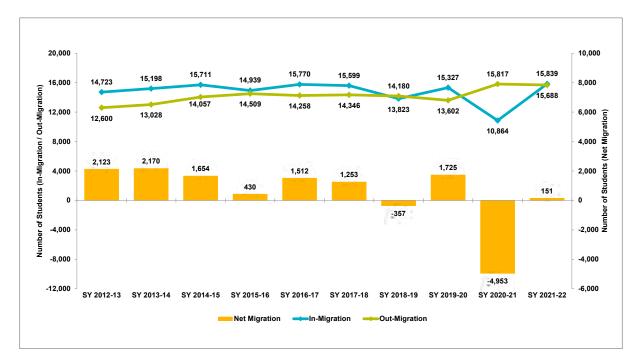

HISTORICAL AND CURRENT NET MIGRATION

Migration, shown in **Figure 2**, refers to students entering (In-Migration) and leaving (Out-Migration) the school division. Net migration is a term used to describe the difference between In-Migration and Out-Migration. A total of 15,839 students migrated into the division and a total of 15,688 students migrated out of the division resulting in a net migration of 151 students, meaning more students entered the school division than withdrew. Combined with the SY 2020-21 migration totals, there has been a net migration of -4,802 students since the SY 2019-20.

Figure 2

Historical and Current Net Migration SY 2012-13 to SY 2021-22

Source: FCPS, Certified Membership, September 2012 to September 2021.

Notes:

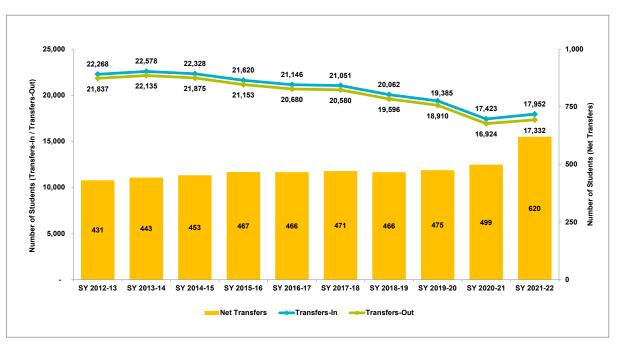

- 1. Membership numbers include general education, special education, AAP, special education centers, alternative school programs, alternative court programs, adult education, multi-agency, and home school and private school special education services.
- 2. Membership includes Thomas Jefferson, Bryant, and Mountain View high schools.
- 3. Membership includes students who attend an FCPS school and reside outside Fairfax County and the City of Fairfax.
- 4. Membership for SY 2012-13 to SY 2017-18 included ESOL transitional high school.
- Effective SY 2021-22, students in the Fairfax County Adult High School Equivalency program are considered as part of Fairfax County Adult School student membership.
- 6. Dates for student membership projections and official budget counts are based on special education and special education preschool (December 1), nontraditional sites (January 31), and FCPS PreK (March 31).

HISTORICAL AND CURRENT NET TRANSFERS

Transfers, shown in **Figure 3**, are students who reside within one school boundary and are assigned to the school associated with that boundary (base school) but attend a school within a different boundary (attending school). "Transfer-In" membership numbers include students that attend an FCPS school and reside outside Fairfax County and the City of Fairfax. "Transfer-Out" membership numbers do not include students that attend an FCPS school and reside outside Fairfax County and the City of Fairfax. "Transfer-Out" membership numbers do not include students that attend an FCPS school and reside outside Fairfax County and the City of Fairfax. Net transfer is a term used to describe the difference between student transfers into and transfers out of a school. Transfers also include students who reside outside the school division but attend a school in the school division.

A total of 17,952 students transferred into a school other than their base (assigned) school and 17,332 students transferred out of their base (assigned) school, resulting in a net transfer of 620 students.

Figure 3

Historical and Current Net Transfers SY 2012-13 to SY 2021-22

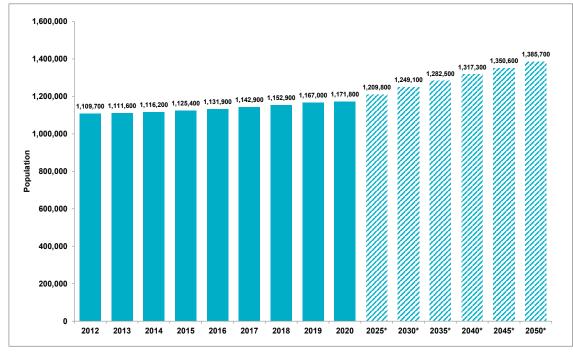

Source: FCPS, *Certified Membership*, September 2012 to September 2021. Notes:

- Membership numbers include general education, special education, AAP, FCPS PreK, preschool, special education centers, preschool resource centers, alternative school programs, alternative court programs, adult education, multi-agency, and home school and private school special education services.
- 2. Membership includes Thomas Jefferson, Bryant, and Mountain View high schools.
- 3. Membership for SY 2012-13 to SY 2017-18 included ESOL transitional high school.
- 4. Transfer-In membership includes students who attend an FCPS school and reside outside Fairfax County and the City of Fairfax. Transfer-Out membership does not include students that attend an FCPS school and reside outside Fairfax County and the City of Fairfax.
- 5. Transfer-In and Transfer-Out totals do not match due to students who reside outside Fairfax County and the City of Fairfax and transfer into an FCPS school or nontraditional school.
- 6. FCPS Virtual Program provides virtual instruction to support students who have been approved for SY 2021-22.
- 7. Effective SY 2021-22, students in the Fairfax County Adult High School Equivalency program are considered as part of Fairfax County Adult School student membership.
- 8. Dates for student membership projections and official budget counts are based on special education and special education preschool (December 1), nontraditional sites (January 31), and FCPS PreK (March 31).

ACTUAL AND PROJECTED TOTAL POPULATION—FAIRFAX COUNTY

The Fairfax County total population as of January 1st of each year, shown in **Figure 4**, is the sum of two components: household population and group quarters population. Two different methodologies are used to estimate and forecast each relative population by the Fairfax County government. The household population is comprised of those persons who live in housing units. The group quarters population is comprised of those persons who live in institutions such as nursing homes, dormitories, and military facilities. The total population estimate shows a small increase from the actual total population of 1,167,000 in 2019 to 1,171,800 in 2020 and projected to show a steady increase to 1,385,700 in 2050 in the long-range planning timeframe.

Figure 4

Fairfax County Actual and Projected Total Population 2012 to 2050

*Projected

Source: Fairfax County Department of Management and Budget, *Demographic Reports, 2013* to 2021. Note:

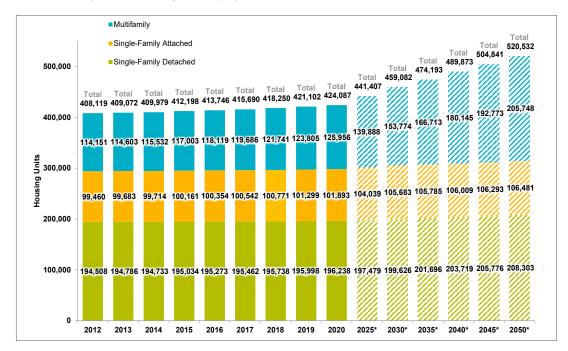

1. Population totals do not include the City of Fairfax.

2. Population totals are rounded to the nearest hundred.

ACTUAL AND PROJECTED TOTAL HOUSING UNITS BY TYPE— FAIRFAX COUNTY

The Fairfax County total housing units as of January 1st of each year, shown in **Figure 5**, is the sum of three components: multifamily, single-family attached, and single-family detached housing types. The multifamily housing includes garden, mid-rise, and high-rise units. The single-family attached housing includes townhouses, duplexes, and multiplexes units. The single-family detached housing includes single-family detached units and mobile homes. The total housing unit estimates are projected to increase from 424,087 in 2020 to 520,532 in 2050. In 2020, total housing units were composed of 46.3 percent single-family detached, 29.7 percent multifamily, and 24.0 percent single-family attached. In 2050, the total housing units are projected to be composed of 40.0 percent single-family detached, 39.5 percent multifamily, and 20.5 percent single-family attached.

Figure 5

Fairfax County Total Housing Units by Type 2012 to 2050

*Projected

Source: Fairfax County Department of Management and Budget, Demographic Report, 2013 to 2020. Notes:

1. Housing unit totals do not include the City of Fairfax.

2. Multifamily housing units include garden units, mid-rise housing units, and high-rise housing units.

3. Single-family attached housing units include townhouses, duplexes, and multiplexes.

4. Single-family detached housing units include mobile.

ACTUAL TOTAL HOUSING UNITS—FAIRFAX COUNTY

Fairfax County housing units are summarized from county real estate tax assessment files as of January 1 of every year. The summary includes both rented and owned habitable single-family detached, single-family attached, and multifamily housing units. The CIP approach focuses on a five-year horizon forecast. In the past five years, the average annual change in the total number of these units in the county has increased from 0.54 percent in 2015 to 0.71 percent in 2020, as shown in Table 1.

Table 1

AVERAGE ANNUAL CHANGE YEAR HOUSING UNITS NUMBER PERCENTAGE 2012 408,119 4,190 1.04% 2013 409,072 953 0.23% 409,979 2014 907 0.22% 2015 412,198 2,219 0.54% 2016 413,746 1,548 0.38% 2017 415,690 1,944 0.47% 2018 418,250 2,560 0.62% 2019 421,102 2,852 0.68% 2020 424,087 2,985 0.71%

Total Housing Units for Fairfax County 2012 to 2020

Source: Fairfax County Department of Management and Budget, Demographic Report 2020, March 2021. Notes: In 2012, growth in housing units is over-represented due to methodology changes and the units of Fort Belvoir are included in the housing unit inventory.

MONITORING MEMBERSHIP IMPACTS FROM NEW HOUSING

The Office of Facilities Planning Services coordinates with the Fairfax County government to determine the potential impacts that proposed residential developments could have on school facilities. A school impact analysis, including estimated student yields generated by planned and proposed development, is provided to the Fairfax County government and the appropriate Fairfax County School Board (FCSB) members. In addition, recommendations are provided to address future school facilities needs in relation to Fairfax County long-range planning initiatives and comprehensive plan studies. Long-range planning initiatives and comprehensive plan studies. For more information on Special Planning Areas in Fairfax County, please refer to the following link: www.fairfaxcounty.gov/planning-zoning/comprehensive-plan/special-planning-areas.

Staff conduct field verifications of residential development as it occurs within each school boundary to track construction status. Field verification allows staff to gain insight into changes within an individual school community and also provides a better understanding as to when and where additional students might impact nearby school capacity as a result of new housing units.

BOUNDARY AND ADVANCED ACADEMIC PROGRAMS (AAP) CENTER ASSIGNMENT CHANGES SY 2012-13 TO SY 2021-22

Table 2, below, shows the boundary adjustments and program center assignment changes, as of SY 2021-22. The process to assign students to schools and programs is directed by the FCSB Policy 8130 and Regulations 8130 and 3333.

STUDENT MEMBERSHIP AND PROJECTIONS

FCPS produces a five-year membership projection set annually that is used for capital planning. **Table 1** shows the membership for School Year (SY) 2019-20 through SY 2021-22 and the projected membership for SY 2022-23 through SY 2026-27. Membership includes general education, special education, AAP, FCPS PreK, preschool, special education centers, preschool resource centers, alternative school programs, alternative court programs, adult education, multi-agency, and home school and private school special education services. The five-year membership projection set shows a decline in the future forecast. This is a change from the growth FCPS experienced prior to SY 2018-19. The causes for this projected decline include smaller cohorts of students entering kindergarten; the number of births; the school-aged population; an increase in migration out of the division over the past ten years; and impacts from COVID pandemic. Note that the impacts from COVID-19 are uncertain and may affect the accuracy of the student

Historical and projected membership is based on the September certified membership in the identified school year. Historical membership for the SY 2012-13 through SY 2021-22 and projected membership for

Sources:

1. FCPS, Certified Membership, September 2019 to September 2021.

2. FCPS, Projections, Fall 2021.

Notes:

1. Membership includes general education, special education, AAP, FCPS PreK, preschool, special education centers, preschool resource centers, alternative school programs, alternative court programs, adult education, multi-agency, and home school and private school special education services.

2. Membership includes students who attend an FCPS school and reside outside Fairfax County and the City of Fairfax.

3. FCPS Virtual Program provides virtual instruction to support students who have been approved for SY 2021-22.

The impacts of COVID-19 are uncertain and may affect the accuracy of the student membership projections.
 Dates for official budget counts are special education and special education preschool (December 1), nontraditional sites (January 31), and FCPS PreK

(March 31).

- 2. Membership includes Thomas Jefferson, Bryant, and Mountain View high schools.
- 3. Membership includes students that attend an FCPS school and reside outside Fairfax County and the City of Fairfax.
- 4. Percentages for Elementary School do not add up to 100 percent due to AAP being calculated as a percent of the total of the 3rd to 6th grade population.
- 5. Dates for official budget counts are special education and special education preschool December 1, nontraditional sites January 31, and FCPS PreK March 31.

CURRENT STATE AND FUTURE OUTLOOK

The Fiscal Year (FY) 2023-2027 CIP builds upon the previous Capital Construction Cash Flow, which is based on the renovation queue status, shown in **Table 3**, and other capital projects that are needed to address capacity issues.

Capital projects are those related to new construction, capacity enhancements, renovations, and site acquisition. There are typically three phases to these projects: planning/design, permitting, and construction. An elementary school renovation can take four years to complete, while a middle or high school project can take six years. An addition can take four years for planning/design, permitting, and construction, while the relocation of a modular can take two years for permitting and construction.

Table 5 shows the current Capital Construction Cash Flow, which details the funding allocation and the remaining unfunded amount for listed projects in the ten-year timeframe. **Table 6** illustrates the phasing timeline for identified capital projects.

DETERMINING RENOVATION REQUIREMENTS

Approximately 90 percent of the CIP funding is allocated for the renovation of existing school facilities. This is a significant expenditure that reflects both the age of the facilities and the commitment of the FCSB to ensure that all schools are able to accommodate current educational programs. Ideally, renovations should occur on a 20- to 25-year cycle in order to protect capital investment; however, the current renovation cycle occurs once every 37 years. The renovation program is funded and executed according to the renovation queue, approved by FCSB in 2009.

School evaluation studies were completed in 1988, 2000, and 2008. The first two studies assessed buildings on two criteria: the condition and the age of each facility. The 2008 study developed and utilized the following evaluation criteria, weighted by importance:

- Quantity and quality of core instructional spaces40%
- Quantity and quality of supplemental instructional space 10%
- Code compliance of the facility10%

Multiple teams of architects and engineers evaluated the 63 schools that were constructed or renovated prior to 1992. The scores were totaled from each consulting team, resulting in the ranked order of schools from highest to lowest need. The following table displays the ranked order and the funding status of each school.

Presently, 31 of the 63 schools in the queue have completed renovation. Five schools are in permitting, eight schools are in planning/design, and nine schools are in construction. Ten schools are yet to be funded for renovation. The current estimates, based upon construction costs, available funding, and projected capacity requirements, indicate that all schools within the queue will have funding for either planning/design or construction by the Fall of 2027. It is likely that a new queue will need to be created by 2025. To view information on currently funded projects underway, refer to the Building for Our Future: Capital Improvement project status at www.fcps.edu/about/Capital-Improvement-Project-Status.

¹ Assumes an increase of \$25M in FY 2023 and FY 2024.
 ² Assumes increase of \$50M annually starting FY 2025 for future years.
 ³ On February 4, 2020, School Board voted to amend Fairfax/Oakton ES to Dunn Loring ES
 ⁴ Effective SY 2021-22, Mosby Woods ES was renamed to Mosaic ES.

Notes:

Numbers in red indicate unfunded amounts and numbers in blue indicate funded amounts.
 Numbers may not add up ue to rounding.
 Schedule and expenditures are an estimate and subject to change.

¹ Assumes an increase of \$25M in FY 2023 and FY 2024.

 $^{\rm 2}$ Assumes an increase of \$50M annually starting FY 2025 for future years.

 $^{\rm 3}$ On February 4, 2020, School Board voted to amend Fairfax/Oakton ES to Dunn Loring ES

 $^{\rm 4}$ Effective SY 2021-22, Mosby Woods ES was renamed to Mosaic ES.

Notes:

1. Construction schedule based upon \$180 million Cash Flow through FY 2024.

2. Schedule is an estimate and subject to change.

CAPACITY SOLUTIONS AND IMPLEMENTATION

The annual CIP identifies new schools, capacity enhancements, and renovations that are anticipated to occur over the next five years to address capacity concerns. In addition to the determination of capital projects, the process includes the consideration of potential solutions to alleviate current or anticipated school capacity deficits. The following is a list of those potential solutions. Multiple options can be identified for each school, in no significant order, and could be contingent upon other potential solutions listed. Any option(s) chosen for implementation will be discussed and decided upon through a transparent process with the appropriate stakeholders, in accordance with School Board Policies and Regulations.

- A. Increase efficiency by reassigning instructional spaces within a school to accommodate an increase in membership.
- B. Possible program changes.
- C. Minor interior facility modifications to create additional instructional space and to help accommodate a capacity deficit.
- D. Addition of temporary classrooms to accommodate a short-term capacity deficit.
- E. Repurpose existing inventory of school facilities not currently being used as schools or build a new school facility.
- F. Capacity enhancement through either a modular or building addition.
- G. Utilize existing space on a school site currently used by non-school programs.
- H. Potential boundary adjustment with other schools identified as having a capacity surplus.

BOUNDARY ADJUSTMENT PROCESS

The following points outline the process of selecting schools for a boundary study as part of the CIP process:

- 1. Potential Solutions: A boundary adjustment is an option included in the list of potential solutions to reduce overcrowding and is considered with schools having a capacity surplus (Option H).
- 2. Priority Recommended Boundary Studies: FCSB then identifies schools for which a boundary adjustment is a priority solution. Table 7 identifies those schools for which a boundary study has been chosen as a priority solution for capacity concerns. The capacity deficit and corresponding solution(s) implemented or in progress are further described beginning on page 44.
- 3. Monitoring Capacity Concerns: FCSB identifies schools for future consideration for a boundary adjustment and capacity concerns are then monitored. Table 8 identifies the schools that are currently being monitored and for which a priority boundary adjustment could be a potential solution. In addition, Table 9 identifies schools with a capacity utilization of over 115% and are considered to have a substantial capacity deficit. In the pages following Table 9, the capacity deficit and corresponding solution(s) implemented or in progress are further described for each school.

Selected schools will then undergo a boundary study by the following steps, as outlined in Regulation 8130:

- 1. Scope of Boundary Study: Schools are identified for inclusion in each particular boundary study and presented to the FCSB for approval.
- 2. Community Meetings: Held within each proposed school community to discuss and receive comments first regarding the scope of the boundary study and then for the recommended boundary changes:
 - a. Boundary Scoping Community Meeting(s): The community is asked to suggest which schools and areas should be considered in the boundary adjustment solution. Meetings can be held in advance of a Scope of Boundary Study presentation to the FCSB for approval.
 - b. Boundary Study Community Meeting(s): Potential options are prepared by staff in response to feedback received at the scoping meeting for community consideration. These options are presented to collect feedback and to develop a staff recommendation for the FCSB.
- 3. FCSB Meeting/New Business: The recommendation for each boundary adjustment is presented as new business at a regular meeting.
- 4. Public Hearing: The FCSB holds a public hearing to receive comments from the community regarding the proposed boundary adjustment.
- 5. FCSB/Action: The School Board votes on a decision for the boundary adjustment.

Community engagement is an essential element of the process. Meetings are held within the affected school communities and are facilitated by FCPS staff. The scope of each study is presented to receive suggested revisions from the community. Options are prepared and discussed at an additional meeting and community input is incorporated into a recommended option presented to FCSB. Further opportunity for community engagement occurs as part of the process when proposed options are discussed at FCSB meetings and work sessions. A public hearing is held for additional public comment before any final action is taken.

CURRENT CAPITAL PROJECTS

Capital projects that are in progress during the five-year timeframe, including new school construction, capacity enhancements, and renovations, are described in detail beginning on page 54. New school construction projects are considered when significant capacity deficits are likely to persist over time. Although this is the costliest method of accommodating student growth, it is an important option when capacity needs cannot be met within a given area of the school system. An important component of new school construction is site acquisition. Capacity enhancements are defined as permanent methods for accommodating future needs and are completed for both program changes and in response to growth. Facility renovations are aimed at ensuring that all schools provide the facilities necessary to support current educational programs, regardless of the age of the buildings.

* Indicates new schools or repurposing of sites.

Note: For these, the magisterial district and pyramid of the site are listed.

The following pages outline the capacity history and implemented solutions for the schools identified by the FCSB for priority boundary adjustments in Table 7.

McLean HS Capacity Deficit

A list of potential solutions has been developed to aid in the alleviation of current and projected school capacity deficits. Options have been identified for each school, in no significant order, and could be contingent upon other potential solutions listed. The options chosen for implementation were discussed and decided through a transparent process with the appropriate stakeholders, in accordance with Fairfax County School Board Policies and Regulations.

McLean HS began to experience a capacity deficit in SY 2011-12. The FCSB voted to approve a boundary adjustment on February 4, 2021, which included Mclean HS, Langley HS, Cooper MS, Longfellow MS, Colvin Run ES, Spring Hill ES, and Westbriar ES. The approved boundary adjustment reassigned an estimated 190 students at the HS level and 78 students at the MS level. The student membership, capacity trends, and solutions implemented to address a capacity deficit over the last ten years for McLean HS are presented below.

SCHOOL YEAR	MEMBERSHIP ¹	PROGRAM CAPACITY UTILIZATION	SOLUTIONS IMPLEMENTED OR IN PROGRESS	
SY 2012-13	2,087	105%	D. Added temporary classrooms to accommodate short-term capacity deficit.	
SY 2013-14	2,073	104%	D. Added temporary classrooms to accommodate short-term capacity deficit.	
SY 2014-15	2,050	103%	103%	
SY 2015-16	2,089	106%		
SY 2016-17	2,053	104%		
SY 2017-18	2,167	109%		
SY 2018-19	2,255	114%	D. Added temporary classrooms to accommodate short-term capacity deficit.C. Minor interior facility modifications to create additional instructional space	
SY 2019-20	2,350	118%	 D. Added temporary classrooms to accommodate short-term capacity deficit. C. Minor interior facility modifications to create additional instructional space H. Potential boundary adjustment with schools having a capacity surplus (study began). 	
SY 2020-21	2,292	Unavailable		
SY 2021-22	2,347	107%	 F. Capacity enhancement through a modular or building addition (modular addition completed FY 2022). H. Boundary adjustment with schools having a capacity surplus (effective SY 2021-22 with phasing).

Glen Forest ES Capacity Deficit

A list of potential solutions has been developed to aid in the alleviation of current and projected school capacity deficits. Options have been identified for each school, in no significant order, and could be contingent upon other potential solutions listed. The options chosen for implementation were discussed and decided through a transparent process with the appropriate stakeholders, in accordance with Fairfax County School Board Policies and Regulations.

Glen Forest ES began to experience a capacity deficit in SY 2011-12. The FCSB voted to approve a boundary adjustment on June 17, 2021, which included the elementary schools in the Justice HS pyramid. The approved boundary adjustment is a modified version of the Superintendent's recommendation and reassigned an estimated 497 students. The student membership, capacity trends, and solutions implemented to address a capacity deficit over the last ten years for Glen Forest ES are presented below.

Historical Membership, Capacity Utilization, and Solutions Implemented

SCHOOL YEAR	MEMBERSHIP ¹	PROGRAM CAPACITY UTILIZATION	SOLUTIONS IMPLEMENTED OR IN PROGRESS	
SY 2012-13	999	97%	D. Added temporary classrooms to accommodate short-term capacity deficit.	
SY 2013-14	1,043	104%	D. Added temporary classrooms to accommodate short-term capacity deficit.	
SY 2014-15	1,070	107%		
			A. Increased efficiency by reassigning instructional spaces within a school to accommodate increase in membership.	
SY 2015-16	1,040	94%	C. Minor interior facility modifications to create additional instructional space and help to accommodate capacity deficit.	
SY 2016-17	1,036	95%	 A. Increased efficiency by reassigning instructional spaces within a school to accommodate increase in membership. C. Minor interior facility modifications to create additional instructional space and help to accommodate capacity deficit. 	
SY 2017-18	1,065	97%		
SY 2018-19	1,100	100%	H. Potential boundary adjustment with schools having a capacity surplus (study began).	
SY 2019-20	1,092	101%		
SY 2020-21	1,075	Unavailable		
SY 2021-22	870	82%	H. Boundary adjustment with schools having a capacity surplus (effective SY 2021-22 with phasing).

			\$21,170,000

SITE ACQUISITION

Western High School Project (Est. Completion: FY 2024)

Western High School was initially identified as South West County High School in the southwestern portion of the county to provide relief to overcrowding at existing high schools such as Centreville, Chantilly, and South Lakes. The location was broadened from southwestern to western due to planning for the Silver Line Metrorail Phase 2 (Dulles Extension) and increased potential development intensity and mix of uses in this region. The 2013 School Bond Referendum approved a funding for the site acquisition and the 2021 School Bond Referendum includes additional funding to acquire a site in this area of the county, based on the current cost standards.

PROJECT	FUNDING SOURCE	FY 2023 EXPENDITURES	FY 2024 ¹ EXPENDITURES	TOTAL
Site Acquisition	2013 Bond	\$500,000	\$9,500,000	\$10,000,000
Site Acquisition	2021 Bond	\$13,500,000	-	\$13,500,000
				\$23,500,000

¹ Assumes an increase of \$25M in FY 2023 and FY 2024.

Notes:

2. Numbers may not add up due to rounding.

54

² Assmues increase of \$50M annually starting FY 2025 for future years.

^{1.} Numbers in red and highlighted in yellow indicate unfunded amounts.

CAPACITY ENHANCEMENT PROJECTS

West Potomac High School Addition

An addition is being constructed at West Potomac HS to accommodate increasing enrollment. The building has a program capacity utilization percentage of 119 percent in SY 2021-22, indicating a substantial capacity deficit. The completed project will provide approximately 71,000 SF. The project is in the construction phase, which was funded by the 2019 bond. Planning/design was funded by the 2017 bond.

Falls Church High School Renovation

The project was identified according to the Renovation Queue, approved in 2009. Falls Church HS is ranked 45 of 63 schools in the queue. The project is in the permitting phase, which was funded by the 2017 bond. Construction funding has been included in the 2021 bond. The completed project will provide modern amenities and approximately 126,000 SF to the building.

CAPACITY

MEMBERSHIP AND CAPACITY COMPARISONS

Current and future capacity of FCPS instructional facilities is important to understand and ensure the most efficient use of school facilities. As an effective planning tool, membership and capacity are shown at different levels: countywide, regions, high school pyramids, and individual schools. This section includes school capacity in several different formats, including countywide tables and maps. The information is also organized by region and includes maps by school level, potential solutions, programs, and a region summary illustrating each school's current and projected membership and program capacity utilization percentage.

Calculating Capacity

Capacity is measured differently for the elementary, middle, and high school levels. Elementary school capacity is calculated based upon the number of core classrooms and self-contained special education classrooms. The middle school model can vary from a team-teaching model, in which the number of students is limited by the number of rooms required to support a team, to a departmental model, in which capacity is assessed similarly to the way it is for high schools. High school capacity is far more complex than that in elementary and middle schools. The capacity of a high school is based upon the required core programs and the various elective options available. For all school levels, both a design capacity and a program capacity is calculated.

Design Capacity

Design capacity reflects the capacity of a building as it was originally constructed. Newly constructed and renovated facilities are designed to Educational Specifications. Per Regulation 8120, the Instructional Services Department—in cooperation with the Department of Facilities and Transportation Services, the Department of Information Technology, selected principals, instructional staff members, and consultants— meet periodically to review the Educational Specifications and recommend changes based on current approved educational programs. The Educational Specifications detail how types of spaces are built and specifies size, amenities, and location within a facility. Each space is designed to meet a program's need and each has a different number of students it can accommodate. Over time, the use of a building changes with each unique program having different accommodations and spatial requirements. This changes the facility's program capacity while the design capacity remains the same. The design capacity is updated if the building undergoes a large renovation or addition.

Program Capacity

Program capacity refers to the number of students a facility can accommodate based on the current programs at a school. Unlike design capacity, the program capacity changes each year depending on programs allocated to a facility and how the space is utilized. The program capacity of a space is determined by several factors, including square footage, staffing, and bell schedule. The program capacity of a building is calculated by adding the program capacity of all spaces within a facility. It should also be noted that not all spaces have a capacity if they are not used for daily instruction, such as office spaces.

The programs offered at a school impact the program capacity due to state and local standards, such as class-size caps and student-to-teacher ratios. For example, a Kindergarten classroom as designed has a capacity ratio of 28 students. If that room was scheduled as a preschool autism room the program capacity would be lowered by 22 students due to the preschool autism classrooms being limited to six students per class. The same room with a different use, may have a different program capacity. Due to the unique programs FCPS offers in their facilities, the program capacity will vary from the design capacity in many instances. Over time a school can experience membership fluctuations and evolving community needs. These changes will have a direct impact on programs offered and their respective program capacity. Additionally, the program capacity ratio can change over time as state and local practices refine their standards.

The usage of space is ultimately decided by the school. To meet the instructional and staff needs of the school, a school's administration may change space use, which may also have a direct impact on program capacity. If a principal decides to use a classroom as an office, that space would not have a program capacity and may cause the facility to appear overcrowded in the assessment of facility capacity.

Every year, the Office of Facilities Planning Services sends out a survey for principals and staff to fill out, identifying how each space within their building is used so that capacity architects can calculate the program capacity. Analysis is also performed to offer potential solutions for those experiencing a capacity deficit.

Capacity Utilization

A capacity utilization percentage for each school is shown for the current and projected years. Capacity utilization is membership divided by program capacity and shows what percentage a building is being utilized.

The term capacity deficit is used to describe the circumstance where school membership is higher than program capacity. Consequently, a school with a utilization percentage greater than 100 percent is considered to have a capacity deficit, or to be overcrowded. Capacity ranges have been identified with corresponding descriptions, below.

Capacity Utilization Thresholds

- 115% or More—Schools considered to have a substantial capacity deficit;
- 105%–114%—Schools considered to have a moderate capacity deficit;
- 95%–104%—Schools approaching a capacity deficit or having a slight capacity deficit;
- 85%–94%—Schools considered to have sufficient capacity for current programs and future growth; and
- Less than 85%—Schools considered to have a capacity surplus.

Due to limited funding, thresholds have been established to identify schools with capacity needs which may require adding physical classroom space or simply reprogramming existing spaces. The thresholds below identify the different degrees of capacity deficits.

School Capacity Deficit and Potential Solutions

Considering the Guiding Principles in the Regulation Framework section and the limited funds available, the following criteria have been established to determine which potential solutions to consider for each school with a capacity deficit (see capacity utilization for definition). Please note that this is used as the initial criteria for preliminary analysis only and is not intended to be a comprehensive list due to the specific characteristics of each school.

The following considerations aid in the identification of potential solutions for schools experiencing capacity deficits:

- Renovation Queue: Schools that are scheduled for a capacity enhancement could receive a temporary solution to accommodate the capacity deficit until the completion of the renovation.
- School Programs: Some programs could reduce the program capacity of a school by limiting the number of students each classroom can accommodate or lead to an increase in membership as students transfer into a school for a particular program.
- Student Transfers: The number of students transferring in and out of a school can impact the total membership and the school's capacity utilization percentage.
- Temporary Classrooms: The number of temporary classrooms at a school, along with their usage, is reviewed to determine if they are sufficient to address the current capacity deficit. An increasing number of required temporary classrooms at a school could indicate that a more permanent solution, such as a building addition or a boundary adjustment, could be considered.
- Modular Classrooms: Classrooms in modular buildings are included in the determination of design and program capacity of a school. Schools with both temporary and modular classrooms in addition to having a current and projected capacity deficit could indicate that a more permanent solution, such as a building addition or a boundary adjustment, could be considered.
- Schools with a Capacity Surplus: Nearby schools with a capacity surplus may be considered to provide capacity relief to overcrowded schools through boundary adjustments or program changes.

A list of potential solutions, below, has been developed to address current and projected school capacity deficit(s). Options have been identified for each school, in no significant order, and could be contingent upon other potential solutions listed. Any option(s) chosen for implementation will be discussed and decided upon through a transparent process with the appropriate stakeholders, in accordance with School Board Policies and Regulations.

- A. Increase efficiency by reassigning instructional spaces within a school to accommodate an increase in membership.
- B. Possible program changes.
- C. Minor interior facility modifications to create additional instructional space and to help accommodate a capacity deficit.
- D. Addition of temporary classrooms to accommodate a short-term capacity deficit.
- E. Repurpose existing inventory of school facilities not currently being used as schools or build a new school facility.
- F. Capacity enhancement through either a modular or building addition.
- G. Utilize existing space on a school site currently used by non-school programs.
- H. Potential boundary adjustment with other schools identified as having a capacity surplus.

School Programs Table

Each region contains a programs table. This table includes all the schools (by pyramid) within the region, Title I or K-3 Class Size Reduction status (if any), and any instructional, nontraditional, or special education programs. The table indicates if the programs accept students from outside the school boundary or if these are only school-based programs (see key at the bottom of the table). The table also includes the number of dedicated classrooms used for the School Age Child Care (SACC) program. Programs listed in this table may impact program capacity of a school if they have lower student to teacher staff ratios.

Region Summary Table

Each region ends with a region summary table titled "SY 2021-22 Capacity, Membership, and Projections." The table is divided by high school pyramids which includes K-12 schools. For schools with a modular addition, a line is added to list the capacity and current and projected capacity utilization percentage without the modular classrooms. Nontraditional schools and centers have been added this year. The following information is provided for each school: school design capacity, current program capacity, membership, program capacity utilization percentage, number of temporary classrooms, number of modular classrooms, five-year projections, and projected program capacity utilization percentage. The diagram below illustrates the different parts of the table and is presented as a guide to understanding the information provided.

Nontraditional school capacity is based on the school's overall membership and is included on this map due to the grade levels served at the location.

POTENTIAL SOLUTIONS
The following is a list of potential solutions developed to aid in the alleviation of current and projected school capacity deficit(s). Options have been identified for each school, in no significant order, and could be contingent upon other potential solutions listed. Any option(s) chosen for implementation will be discussed and decided through a transparent process with the City of Fairfax and Fairfax County communities, in accordance with each city and county School Boards' respective Policies and Regulations, as applicable.
A. Increase efficiency by reassigning instructional spaces within a school to accommodate an increase in membership.
B. Possible program changes.
C. Minor interior facility modifications to create additional instructional space and to help accommodate a capacity deficit.
D. Addition of temporary classrooms to accommodate a short-term capacity deficit.
E. Repurpose existing inventory of school facilities not currently being used as schools or build a new school facility.
F. Capacity enhancement through either a modular or building addition.
G. Utilize existing space on a school site currently used by non-school programs.
H. Potential boundary adjustment with other schools identified as having a capacity surplus.
Table 1 identifies the potential solution(s) from the list above for each school within the region. In addition, Table 1 recognizes schools that are currently in construction, as well as those schools that do not have a capacity deficit but are monitored for potential impacts from changes in membership.
Schools in Construction
The following table lists the schools that are in construction in the current year. The schools remain listed until the anticipated completion of the project. Construction projects include:
 Renovation of the existing school building. A renovation can result in an increase or decrease of design capacity due to restructuring of uses to provide efficient instructional spaces per the educational specifications.
• Replacement of modular building with a permanent structure that adjoins the existing school building. This type of renovation can result in an increase or decrease in design capacity due to restructuring of uses to provide efficient instructional spaces per the educational specifications.
• Permanent and adjoining building addition with minor modification to the existing building. Additions typically result in an increase of design capacity of a school.
• Modular building addition on a school site. This addition typically results in an increase of design capacity of a school.
Monitoring Student Membership The following table lists the schools that are monitored for membership in the current school year. Based on the current and projected membership and current program capacity, these schools do not show a capacity deficit, but are monitored to ensure accommodation of unexpected population changes through solutions listed above.
Schools with Modular Additions
The Capacity and Membership tables on the following pages reflect the school capacity and capacity utilization percentage for schools with modular additions as with and without the modular addition. Modular additions are added as a capacity solution for schools experiencing substantial growth due to program changes or development in the area. Considering these schools without the capacity of the modular addition typically results in a significant capacity deficit and could require additional capacity solutions. These solutions could include capacity enhancement through a building addition or potential boundary adjustment with schools having a capacity surplus.

Thomas Jentesion in State Countywate yournames.
 Steffective SY 2021-22, McLean HS is going through a phased-in boundary change. To view additional information on the boundary adjustments, please go to pages 44 and 45.
 Nontraditional school capacity is based on the school's overall membership and is included on this map due to the grade levels served at the location.

CAPACITY CIP <i>FY</i> 2023–27		ptions have been identified for each school, I be discussed and decided through a ds' respective Policies and Regulations, as	Ó	Jeficit.		ools that are currently in construction, as well	pletion of the project. Construction projects	structuring of uses to provide efficient	tion can result in an increase or decrease in	i increase of design capacity of a school.		cted membership and current program anges through solutions listed above.	nools with modular additions as with and to program changes or development in the buld require additional capacity solutions. aving a capacity surplus.
140	POTENTIAL SOLUTIONS	The following is a list of potential solutions developed to aid in the alleviation of current and projected school capacity deficit(s). Options have been identified for each school, in no significant order, and could be contingent upon other potential solutions listed. Any option(s) chosen for implementation will be discussed and decided through a transparent process with the City of Fairfax and Fairfax County communities, in accordance with each city and county School Boards' respective Policies and Regulations, as applicable.	 A. Increase efficiency by reassigning instructional spaces within a school to accommodate an increase in membership. B. Possible program changes. 	C. Minor interior facility modifications to create additional instructional space and to help accommodate a capacity deficit. D Addition of temporary classrooms to accommodate a short-term capacity deficit		Table 1 identifies the potential solution(s) from the list above for each school within the region. In addition, Table 1 recognizes schools that are currently in construction, as well as those schools that do not have a capacity deficit but are monitored for potential impacts from changes in membership.	Schools in Construction The following table lists the schools that are in construction in the current year. The schools remain listed until the anticipated completion of the project. Construction projects include:	 Renovation of the existing school building. A renovation can result in an increase or decrease of design capacity due to restructuring of uses to provide efficient instructional spaces per the educational specifications. 	Replacement of modular building with a permanent structure that adjoins the existing school building. This type of renovation can result in an increase or decrease in design capacity due to restructuring of uses to provide efficient instructional spaces per the educational specifications.	• Permanent and adjoining building addition with minor modification to the existing building. Additions typically result in an increase of design capacity of a school.	 Modular building addition on a school site. This addition typically results in an increase of design capacity of a school. Monitoring Student Membership 	The following table lists the schools that are monitored for membership in the current school year. Based on the current and projected membership and current program capacity, these schools do not show a capacity deficit, but are monitored to ensure accommodation of unexpected population changes through solutions listed above.	Schools with Modular Additions The Capacity and Membership tables on the following pages reflect the school capacity and capacity utilization percentage for schools with modular additions as with and without the modular addition. Modular additions are added as a capacity solution for schools experiencing substantial growth due to program changes or development in the area. Considering these schools without the capacity of the modular addition typically results in a significant capacity deficit and could require additional capacity solutions. These solutions could include capacity enhancement through a building addition or potential boundary adjustment with schools having a capacity surplus.

only offers DP. Lewis, South Lakes, and Mount Vernon high schools also offer the IB includes schools with the Primary Years Program (PYP) , Middle Years Program All high schools checked above offer DP and MYP, except Marshall HS which (MYP), and Diploma Program (DP), where applicable. Career-related Program (CP).

Public Day sites at Burke School, Cedar Lane School, Key Center, Kilmer Center, Pimmit Hills, and Quander Road School. Additional Nontraditional Schools include Adult Completion Programs (Fairfax in non-FCPS owned facilities in Herndon, Falls Church, Fairfax, Centreville, and County Adult HS at Plum Center and Herndon) and various programs housed Alexandria.

FCAHS at Justice HS is evening satellite programs.

Additional TSRC at Graham Road Community Building, and facilities not owned by FCPS (Fairfax Courthouse Complex and Reston YMCA).

include SACC in dedicated classrooms. SACC in temporary classrooms or open resource spaces are not included in this count. Additional SACC at Graham Road SACC program is run by the Fairfax County Government, not FCPS. Numbers Additional ACE at Graham Road Community Building and Plum Center. ' School is currently going through phasing for AAP Local Level IV. Community Building. Governor's School.

¹⁰ Lanier MS was renamed to Katherine Johnson MS, effective in SY 2021-22.

¹¹ Mosby Woods ES was renamed to Mosaic ES, effective SY2021-22.

Y - Accepts students from inside and outside school boundary. Y-HI - Program for students with hearing impairment. Y-SB - School-based students only.

¹ School is currently going through a phased-in boundary adjustment.

² School is currently adding or removing instructional or special education programs.

³ School is going through a renovation or has completed renovation in the current school year.

⁴ School is a general education school and an AAP center.

⁵ School does not follow typical pyramid feeder pattern.

 - 2. FCPS, Projections, Fall 2021.
- 3. FCPS Office of Facilities Planning Services, Capacity and Utilization Surveys, SY 2021-22.

4. FCPS Office of Design and Construction, *Trailer Asset Report*, September 2021.

Notes:

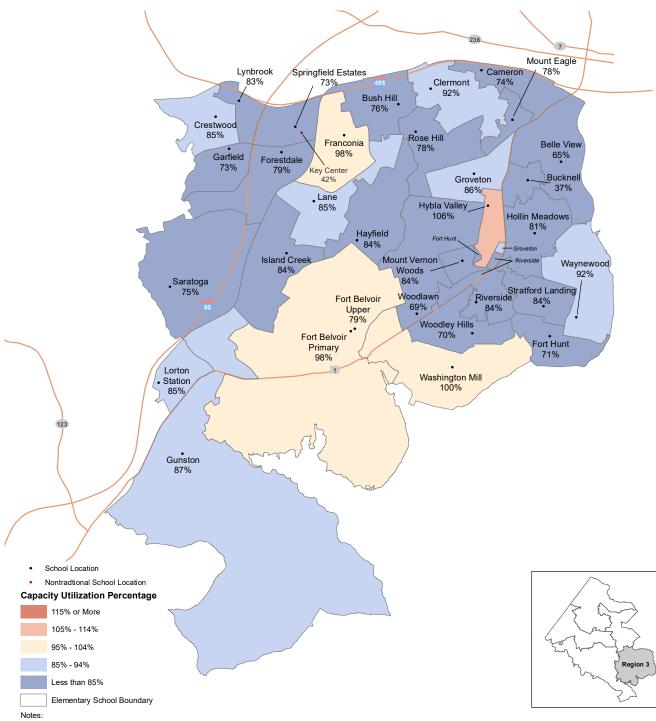

- 1. A guide to understanding the information on these tables can be found at the beginning of the Membership and Capacity Comparisons section.
- 2. Numbers highlighted in yellow are future design capacity and projected capacity utilization percentages after a renovation or capacity enhancement.
- 3. Pre-construction program capacity is used for schools currently in construction. For a list of schools in construction, refer to Potential Capacity Solutions table for this region.
- 4. Membership includes general education, special education, AAP, FCPS PreK, preschool, special education centers, preschool resource centers, alternative school programs, and alternative court programs.
 - 5. Membership includes students who attend an FCPS school and reside outside Fairfax County and the City of Fairfax.
- 6. Dates for official budget counts are special education and special education preschool (December 1), nontraditional sites (January 31), and FCPS PreK (March 31).
 - 7. The impacts of COVID-19 are uncertain and may affect the accuracy of the student membership projections.
 - 8. For schools with utilization percentage in red, refer to Potential Solutions table for this region.
- 9. To view information pertaining to Capacity and Membership, Facilities and Sites, and Pyramid and Special Programs, please visit the FCPS Facilities and Membership Dashboards at www.fcps.edu/about-fcps/facilities-planning-future/ acilities-and-membership-dashboards.

 Nontraditional school capacity is based on the school's overall membership and is included on this map due to the grade levels served at the location.

Based on SY 2021-22 boundaries.
 Nontraditional school capacity is based on the school's overall membership and is included on this map due to the grade levels served at the location.

	POTENTIAL SOLUTIONS	The following is a list of potential solutions developed to aid in the alleviation of current and projected school capacity deficit(s). Options have been identified for each school, in no significant order, and could be contingent upon other potential solutions listed. Any option(s) chosen for implementation will be discussed and decided through a transparent process with the City of Fairfax and Fairfax County communities, in accordance with each city and county School Boards' respective Policies and Regulations, as applicable.	 A. Increase efficiency by reassigning instructional spaces within a school to accommodate an increase in membership. B. Possible program changes. 	C. Minor interior facility modifications to create additional instructional space and to help accommodate a capacity deficit.	D. Addition of temporary classrooms to accommodate a short-term capacity deficit. E. Repurpose existing inventory of school facilities not currently being used as schools or build a new school facility.		G. Utilize existing space on a school site currently used by non-school programs.	H. Potential boundary adjustment with other schools identified as having a capacity surplus.	Table 1 identifies the potential solution(s) from the list above for each school within the region. In addition, Table 1 recognizes schools that are currently in construction, as well as those schools that do not have a capacity deficit but are monitored for potential impacts from changes in membership.	Schools in Construction	The following table lists the schools that are in construction in the current year. The schools remain listed until the anticipated completion of the project. Construction projects include:	• Renovation of the existing school building. A renovation can result in an increase or decrease of design capacity due to restructuring of uses to provide efficient instructional spaces per the educational specifications.	Replacement of modular building with a permanent structure that adjoins the existing school building. This type of renovation can result in an increase or decrease in design capacity due to restructuring of uses to provide efficient instructional spaces per the educational specifications.	• Permanent and adjoining building addition with minor modification to the existing building. Additions typically result in an increase of design capacity of a school.	• Modular building addition on a school site. This addition typically results in an increase of design capacity of a school.	Monitoring Student Membership The following table lists the schools that are monitored for membership in the current school year. Based on the current and projected membership and current program capacity, these schools do not show a capacity deficit, but are monitored to ensure accommodation of unexpected population changes through solutions listed above.	Schools with Modular Additions The Capacity and Membership tables on the following pages reflect the school capacity and capacity utilization percentage for schools with modular additions as with and	without the modular addition. Modular additions are added as a capacity solution for schools experiencing substantial growth due to program changes or development in the area. Considering these schools without the capacity of the modular addition typically results in a significant capacity deficit and could require additional capacity solutions. These solutions could include capacity enhancement throuch a building addition or potential boundary adjustment with schools having a capacity surplus. IB includes schools with the Primary Years Program (PYP) , Middle Years Program (MYP), and Diploma Program (DP), where applicable. All high schools checked above offer DP and MYP, except Marshall HS which only offers DP. Lewis, South Lakes, and Mount Vernon high schools also offer the Public Day sites at Burke School, Cedar Lane School, Key Center, Kilmer Center, Career-related Program (CP).

Pimmit Hills, and Quander Road School.

Additional Nontraditional Schools include Adult Completion Programs (Fairfax County Adult HS at Plum Center and Herndon) and various programs housed in non-FCPS owned facilities in Herndon, Falls Church, Fairfax, Centreville, and Alexandria.

⁵ Additional TSRC at Graham Road Community Building, and facilities not owned by FCPS (Fairfax Courthouse Complex and Reston YMCA). FCAHS at Justice HS is evening satellite programs.

Additional ACE at Graham Road Community Building and Plum Center.

resource spaces are not included in this count. Additional SACC at Graham Road include SACC in dedicated classrooms. SACC in temporary classrooms or open SACC program is run by the Fairfax County Government, not FCPS. Numbers Community Building. Governor's School.

¹⁰ Lanier MS was renamed to Katherine Johnson MS, effective in SY 2021-22. School is currently going through phasing for AAP Local Level IV.

¹¹ Mosby Woods ES was renamed to Mosaic ES, effective SY2021-22.

Y - Accepts students from inside and outside school boundary.

Y-SB - School-based students only.

Y-HI - Program for students with hearing impairment.

Quander Road ⁵

² School is currently adding or removing instructional or special education programs.

³ School is going through a renovation or has completed renovation in the current school year.

⁴ School is a general education school and an AAP center.

⁵ School does not follow typical pyramid feeder pattern.

- 2. FCPS, Projections, Fall 2021.
- 3. FCPS Office of Facilities Planning Services, Capacity and Utilization Surveys, SY 2021-22.
 - 4. FCPS Office of Design and Construction, Trailer Asset Report, September 2021.

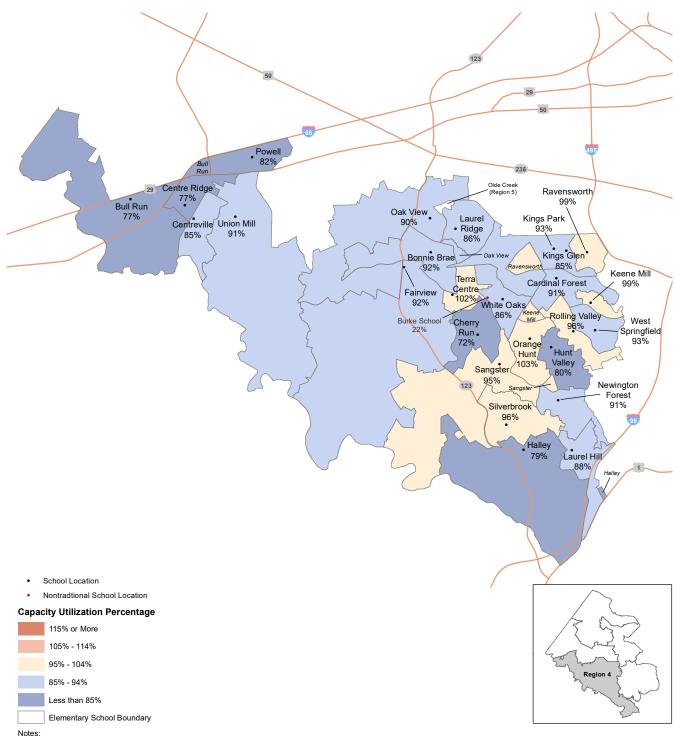

Notes:

- 1. A guide to understanding the information on these tables can be found at the beginning of the Membership and Capacity Comparisons section.
- Numbers highlighted in yellow are future design capacity and projected capacity utilization percentages after a renovation or capacity enhancement. 2
- Pre-construction program capacity is used for schools currently in construction. For a list of schools in construction, refer to Potential Capacity Solutions table for this region. ю.
- 4. Membership includes general education, special education, AAP, FCPS PreK, preschool, special education centers, preschool resource centers, alternative school programs, and alternative court programs.
 - 5. Membership includes students who attend an FCPS school and reside outside Fairfax County and the City of Fairfax.
- 6. Dates for official budget counts are special education and special education preschool (December 1), nontraditional sites (January 31), and FCPS PreK (March 31).
 - The impacts of COVID-19 are uncertain and may affect the accuracy of the student membership projections. 7.
 - For schools with utilization percentage in red, refer to Potential Solutions table for this region
- To view information pertaining to Capacity and Membership, Facilities and Sites, and Pyramid and Special Programs, please visit the FCPS Facilities and Membership Dashboards at www.fcps.edu/about-fcps/facilities-planning-future/ facilities-and-membership-dashboards.

CAPACITY CIP <i>FY</i> 2023–27		tions have been identified for each school, be discussed and decided through a ' respective Policies and Regulations, as	ificit.	ols that are currently in construction, as well	letion of the project. Construction projects	ucturing of uses to provide efficient on can result in an increase or decrease in	ncrease of design capacity of a school.	ed membership and current program ges through solutions listed above.	ools with modular additions as with and o program changes or development in the Ild require additional capacity solutions. ving a capacity surplus.
176	POTENTIAL SOLUTIONS	The following is a list of potential solutions developed to aid in the alleviation of current and projected school capacity deficit(s). Options have been identified for each school, in no significant order, and could be contingent upon other potential solutions listed. Any option(s) chosen for implementation will be discussed and decided through a transparent process with the City of Fairfax and Fairfax County communities, in accordance with each city and county School Boards' respective Policies and Regulations, as applicable.	 A. Increase efficiency by reassigning instructional spaces within a school to accommodate an increase in membership. B. Possible program changes. C. Minor interior facility modifications to create additional instructional space and to help accommodate a capacity deficit. D. Addition of temporary classrooms to accommodate a short-term capacity deficit. E. Repurpose existing inventory of school facilities not currently being used as schools or build a new school facility. 	 F. Capacity enhancement through either a modular or building addition. G. Utilize existing space on a school site currently used by non-school programs. H. Potential boundary adjustment with other schools identified as having a capacity surplus. Table 1 identifies the potential solution(s) from the list above for each school within the region. In addition, Table 1 recognizes schools that are currently in construction, as well as those schools that do not have a capacity deficit but are monitored for potential impacts from changes in membership. 	Schools in Construction The following table lists the schools that are in construction in the current year. The schools remain listed until the anticipated completion of the project. Construction projects include:	 Renovation of the existing school building. A renovation can result in an increase or decrease of design capacity due to restructuring of uses to provide efficient instructional spaces per the educational specifications. Replacement of modular building with a permanent structure that adjoins the existing school building. This type of renovation can result in an increase or decrease in design capacity due to restructuring of uses to provide efficient instructional spaces per the educational specifications. 	 Permanent and adjoining building addition with minor modification to the existing building. Additions typically result in an increase of design capacity of a school. Modular building addition on a school site. This addition typically results in an increase of design capacity of a school. 	Monitoring Student Membership The following table lists the schools that are monitored for membership in the current school year. Based on the current and projected membership and current program capacity, these schools do not show a capacity deficit, but are monitored to ensure accommodation of unexpected population changes through solutions listed above.	Schools with Modular Additions The Capacity and Membership tables on the following pages reflect the school capacity and capacity utilization percentage for schools with modular additions as with and without the modular addition. Modular additions are added as a capacity solution for schools experiencing substantial growth due to program changes or development in the area. Considering these schools without the capacity of the modular addition typically results in a significant capacity deficit and could require additional capacity solutions. These solutions could include capacity enhancement through a building addition or potential boundary adjustment with schools having a capacity surplus.

Note: Based on SY 2021-22 boundaries

CAPACITY CIP <i>FY</i> 2023–27		tions have been identified for each school, be discussed and decided through a ' respective Policies and Regulations, as		nicit.		ols that are currently in construction, as well	letion of the project. Construction projects	ucturing of uses to provide efficient	on can result in an increase or decrease in	ncrease of design capacity of a school.	ed membership and current program iges through solutions listed above.	ools with modular additions as with and o program changes or development in the ild require additional capacity solutions. ving a capacity surplus.
194	POTENTIAL SOLUTIONS	The following is a list of potential solutions developed to aid in the alleviation of current and projected school capacity deficit(s). Options have been identified for each school, in no significant order, and could be contingent upon other potential solutions listed. Any option(s) chosen for implementation will be discussed and decided through a transparent process with the City of Fairfax and Fairfax County communities, in accordance with each city and county School Boards' respective Policies and Regulations, as applicable.	Increase efficiency by reassigning instruction Possible program changes.		 Lapacity enhancement through either a modular or building addition. Utilize existing space on a school site currently used by non-school programs. Potential boundary adjustment with other schools identified as having a capacity surplus. 	Table 1 identifies the potential solution(s) from the list above for each school within the region. In addition, Table 1 recognizes schools that are currently in construction, as well as those schools that do not have a capacity deficit but are monitored for potential impacts from changes in membership.	Schools in Construction The following table lists the schools that are in construction in the current year. The schools remain listed until the anticipated completion of the project. Construction projects include:	 Renovation of the existing school building. A renovation can result in an increase or decrease of design capacity due to restructuring of uses to provide efficient instructional spaces per the educational specifications. 	Replacement of modular building with a permanent structure that adjoins the existing school building. This type of renovation can result in an increase or decrease in design capacity due to restructuring of uses to provide efficient instructional spaces per the educational specifications.	 Permanent and adjoining building addition with minor modification to the existing building. Additions typically result in an increase of design capacity of a school. Modular building addition on a school site. This addition horizon horizon of design capacity of a school. 	Monitoring Student Membership The following table lists the schools that are monitored for membership in the current school year. Based on the current and projected membership and current program capacity, these schools do not show a capacity deficit, but are monitored to ensure accommodation of unexpected population changes through solutions listed above.	Schools with Modular Additions The Capacity and Membership tables on the following pages reflect the school capacity and capacity utilization percentage for schools with modular additions as with and without the modular addition. Modular additions are added as a capacity solution for schools experiencing substantial growth due to program changes or development in the area. Considering these schools without the capacity of the modular addition typically results in a significant capacity deficit and could require additional capacity solutions. These solutions could include capacity enhancement through a building addition or potential boundary adjustment with schools having a capacity surplus.

Membership: FCPS, Certified Membership, September 30, 2021;

Projected Membership: FCPS, Facilities Planning Services, Projections, Fall 2021; Program Capacity and Modular Classrooms: FCPS, Facilities Planning Services, Capacity and Utilization Surveys, SY 2021-22.

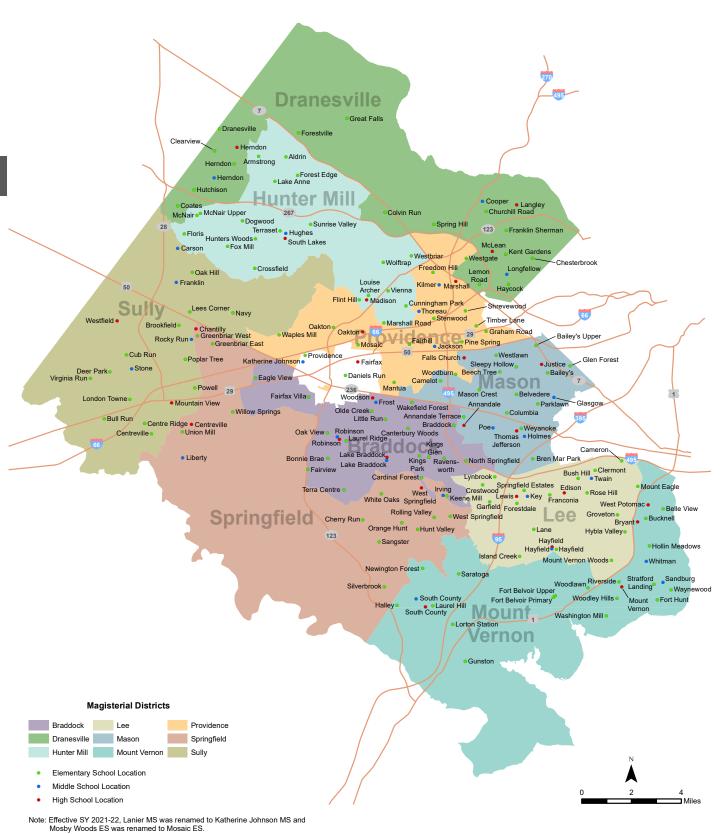

Notes:

Membership numbers include: general education, special education, AAP, FCPS Pre-K and preschool (wherever applicable) students. Membership numbers do not include: adult education, private school special education, home schooled, multi-agency, transitional ESOL high schools, or special education centers.
 Pre-construction program capacity is used for schools currently in construction. For a list of schools in construction, refer to Potential Capacity Solutions table for each region.
 Projected Program Capacity for 5Y 208-27 includes future design capacity of schools are neovation or capacity enhancement.
 Noricated Program Capacity for 5Y 208-27 includes future design capacity of schools are neovation or capacity enhancement.
 Noricated Thomas Jefferson HS capacity and membership are not included in the Region totals.

FAIRFAX COUNTY COMPREHENSIVE PLAN: SPECIAL PLANNING AREAS WITH HIGH SCHOOL BOUNDARIES | SY 2021-22

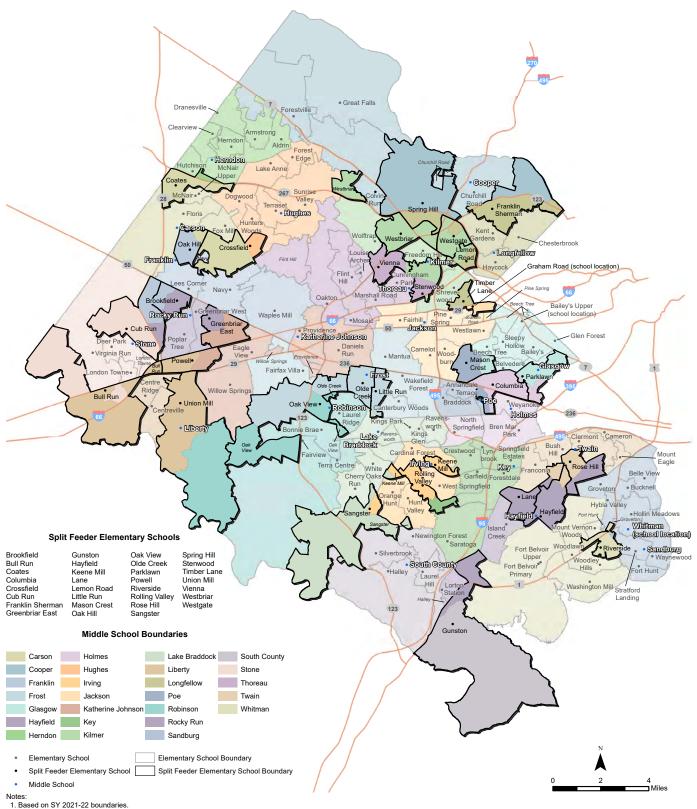

- 1. Based on SY 2021-22 boundaries.

- Based on SY 2021-22 boundaries.
 Thomas Jefferson HS, Mountain View HS, and Bryant HS have countywide boundaries.
 Biterious SY 2021-22, McLean HS and Langley HS are going through a phased-in boundary change. To view additional information on the boundary adjustments, please go to pages 44 and 45.
 Innovation Center has its boundary within Dulles and Dunn Loring has its boundary within Merrifield.
 For more information on Fairfax County Comprehensive Plan Special Planning Areas, refer to the following link: https://www.fairfaxcounty.gov/planning-zoning/comprehensive-plan/special-planning-areas.

SPLIT FEEDER INFORMATION

ELEMENTARY SCHOOL BOUNDARIES | SY 2021–22

With Middle School Boundaries

Based on SY 2021-22, Doupnaries.
 Effective SY 2021-22, Cooper MS, Longfellow MS, Glen Forest ES, Bailey's ES and Bailey's Upper ES, Beech Tree ES, Belvedere ES, Parklawn ES, and Sleepy Hollow ES are going through a phased-in boundary change. To view additional information on the boundary adjustments, please go to pages 44 and 45.
 Effective SY 2021-22, Lanier MS was renamed to Katherine Johnson MS and Mosby Woods ES was renamed to Mosaic ES.

ASSET MANAGEMENT PROGRAM

The Department of Facilities and Transportation Services, Office of Facility Management (OFM) instituted an asset management program in the early 2000s as part of its core mission. The program inventories major building systems, as well as associated equipment, and develops analytics to identify lifecycle expectations and optimize service life by application of an effective maintenance and replacement strategy. Along with life cycle analysis, OFM has implemented a process to perform and assign a base condition and mission criticality rating to each asset. The asset condition and criticality rating combine to provide an industry accepted asset assessment index (AI) value, which allows staff to prioritize resources for maintenance and replacement. The program provides a foundation to ensure FCPS meets its Strategic Plan Goal for Resource Stewardship but needs additional investment to develop a comprehensive facility condition assessment (FCA) of all assets.

In FY 2018, the Office of Auditor General (OAG) provided the following definition for a FCA, "Facilities condition assessment is the process of developing a comprehensive picture of physical conditions and the functional performance of buildings and infrastructure; analyzing the results of data collection and observations; and reporting and presenting findings. The main objective of the facilities condition assessment is to measure the condition and functionality factors that make sure both the building and its infrastructure are of adequate condition and appropriate for intended functions. FCPS has never performed an asset-level facility condition assessment (FCA) to adequately validate the deferred maintenance backlog and to assist with prioritization of capital renewal needs" *(FY 2018 Facilities Maintenance Audit)*.

OAG recommends further elevation and escalation of the need to initiate an asset-level facility condition assessment based on the latest industry standards. The goal is to provide objective, consistent, accurate, and repeatable results to generate a more precise capital renewal funding forecast. This will also provide credibility in defending the balanced and equitable distribution of funding among FCPS schools. This effort will allow FCPS to have regular assessments of schools, identify specific projects, and allow the Fairfax County School Board (FCSB) and staff to ensure most urgent requirements are being addressed in a timely manner. OFM should adopt an asset level FCA program to adequately validate backlogs of deferred maintenance and prioritize capital renewal needs.

During the summer of 2008, at the request of the FCSB, the Department of Facilities and Transportation Services, Office of Design and Construction (D&C) dispatched an independent third-party engineering consultant firm, to evaluate the school renovation queue based on factors such as fundamental educational requirements and facility condition (building envelope) assessment. However, the survey did not entail an adequate detail assessment of capital assets within each facility. Critical building systems and components have been inventoried at all FCPS facilities, except for the schools currently under renovation. There are other capital assets that remain to be inventoried or completed such as finished flooring, plumbing fixtures, exterior buildings, that will require capital investment to replace. Inventorying these assets will also increase existing financial requirements both in future needs and current deferred replacement backlog.

In 2012, the Facility Engineering Associates (FEA) conducted a survey of FCPS assets and provided its findings in the '2012 Final Report for Performance Management Assessment,' where it was identified that FCPS should realistically have a deferred maintenance backlog of \$530M.

Assets not included (or incomplete) in FCPS' current asset inventory are as follows:

- Asphalt (in progress)
- Roofing (managed by D&C)
- General flooring*
- Trails and paths
- Lockers

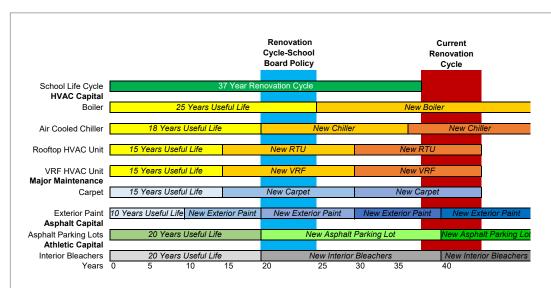

- Athletic buildings (concession, press, ticket)*
- Electric disconnects
- Athletic field lighting*
- Hardscape (basketball courts, aggregate parking/roads, concrete curb and gutter/sidewalks, fencing, exterior signage)*
- Landscape (non-turf, turf)*
- Field/Grounds maintenance (athletic fields, athletic fencing, and backstop)*
- Signs (building and site signs)*
- Handicapped equipment –Door openers
- Storm Water Management Facility
- Plumbing fixtures*
- Painting-Interior and Exterior

(*) indicates assets not yet inventoried but to be done in the future

The OAG FY 2018 Facilities Maintenance Audit also states, "It shall be the further goal of the Fairfax County School Board to provide for the systematic maintenance of major and critical building infrastructure components, primarily through the comprehensive building renovation program and, additionally, through the establishment of infrastructure maintenance programs in annual planning and budgeting. Infrastructure maintenance programs shall be based on the life cycle expectancy of building systems and components and shall assure that mechanical, electrical, electronic, and structural systems will support the effective and efficient operation of buildings."

As schools are renovated, D&C replaces and updates all building systems that have reached the end of their useful life. Useful life of school facilities and building assets require renovation of buildings every 20 to 25 years – a requirement that is detailed in FCSB Policy 8252.2. The current cycle between renovations, however, is approximately 37 years. Infrastructure investments in building assets are needed at shorter intervals to support system life expectancy (see **Figure 1**). These replacements are needed to keep the building functional, maintain a satisfactory learning environment, and avoid expensive maintenance and repair.

Figure 1

Renovation Cycle School Board Policy

The average asset age of capital assets inventoried is currently 17 years with 32 percent of these past their life cycle (see Table 1).

Table 1

Capital Asset Inventory and Life Cycle Information

ASSET CATEGORY	TOTAL ASSETS	ASSET PAST USEFUL LIFE	AVG. LIFE EXPECTANCY (YEARS)	AVG. ASSET AGE (YEARS)	ESTIMATED REPLACMENT COST
ADA Accessibility	222	75	25	20	\$65,852,188
Asphalt/Pavement	1,284	428	22	17	\$52,062,936
Athletic Infrastructure	983	331	21	16	\$103,780,050
Electrical Systems	9,874	2,284	22	16	\$182,908,497
Energy Management Systems	213	68	17	14	\$167,214,924
Environmental	89	35	30	31	\$1,395,878
Fire Sprinklers Systems	3,442	1,233	25	21	\$16,201,451
Health/Safety	474	180	18	15	\$16,027,222
HVAC Infrastructure	35,195	12,124	21	17	\$407,860,101
Playground Systems	258	138	15	15	\$35,587,705
Plumbing Systems	2,292	632	18	13	\$29,996,934
Structural Systems	203	123	24	26	\$3,981,769
Grand Total	54,529	17,651	21	17	1,082,869,655

According to the National Research Council (NRC) report entitled 'Committing to the Cost of Ownership: The Maintenance and Repair of Public Building' and referenced in the '2012 Final Report for Performance Management Assessment, 'conducted by Facility Engineering Associates (FEA) "The appropriate level of Maintenance and Repair spending should be, on average, in the range of 2 to 4 percent of Current Replacement Valve (CRV)."

- The current replacement value for FCPS is \$6.5 billion.
- FCPS' operating budget of \$42.8 million represents about 0.7 percent of the total CRV.
- FCPS' capital renewal budget, including major maintenance and infrastructure renewal funds is \$18.6 million, or 0.29 percent CRV.
- Does not include major renovation and new construction projects.
- The combined the equivalent maintenance and repair for FCPS just under **1.0 percent** for the CRV. ٠

The current capital infrastructure replacement backlog is at \$217M, and the projected 5-year capital asset End of Useful Life replacement requirements is an additional \$146M (see Table 2).

Table 2

Infrastructure Replacement Backlog and Project Replacement Requirements

ТҮРЕ	BACKLOG	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	TOTAL VALUE
HVAC Capital Requirements	\$128.3M	\$13.3M	\$9.0M	\$20.3M	\$11.2M	\$23.7M	\$205.7M
Athletic Capital Requirements	\$6.3M	\$1.0M	\$2.0M	\$1.4M	\$3.4M	\$2.7M	\$16.8M
Asphalt Capital Requirements	\$10.2M	\$.8M	\$2.9M	\$1.3M	\$.3M	\$1.0M	\$16.4M
Major Maintenance Requirements	\$72.4M	\$5.7M	\$8.7M	\$10.5M	\$13.0M	\$13.8M	\$124.0M
Total Requirements	\$217.1M	\$20.8M	\$22.6M	\$33.5M	\$27.8M	\$41.1M	\$363.0M

The County Transfer funds are solely dedicated to capital asset replacement, while Major Maintenance funds mostly cover major repair work. However, based on the criticality of resource needs, some Major Maintenance funding has been used to replace various capital assets. **Table 3** illustrates the allocation of the County Transfer within FCPS.

Table 3

CATEGORY	FY 2018	FY 2019	FY 2020	FY 2021	FY 2022
HVAC Capital	\$3,625,000	\$3,625,000	\$3,625,000	\$3,625,000	\$1,625,000
Asphalt Capital	\$750,000	\$750,000	\$750,000	\$750,000	\$2,750,000
Athletic Capital	\$1,250,000	\$1,250,000	\$1,250,000	\$1,250,000	\$1,250,000
Technology	\$2,000,000	\$2,000,000	\$2,000,000	\$2,000,000	\$2,000,000
ADA Upgrades	\$1,250,000	\$1,250,000	\$1,250,000	\$1,250,000	\$1,250,000
Safety and Security Enhancement	\$600,000	\$600,000	\$600,000	\$600,000	\$600,000
Roof Replacements	\$3,625,000	\$6,125,000	\$3,625,000	\$3,625,000	\$3,625,000
Major Maintenance	\$10,000,000	\$10,000,000	\$10,000,000	\$10,000,000	\$13,000,000
Total	\$23,100,000	\$25,600,000	\$23,100,000	\$23,100,000	\$26,100,000

FY 2018-22 Allocated Funding for Capital Asset Replacement and Maintenance Repair

On average, \$5.6 million of the County Transfer is used for major asset replacement. The rest of these funds are used for various infrastructure needs such as security systems (OSS), IT infrastructure, roof replacements (D&C), and ADA accessibility. Critical assets are identified as needing replacement based on the following criteria:

- Occupant's safety and health
- Likelihood of imminent equipment failure
- Maintaining optimal system functionality
- Manufacturer's recommended life expectancy
- Reducing organizational risk and liability

In FY22, FCPS will receive federal funding from the Elementary and Secondary School Emergency Relief (ESSER) grant. A total of **\$84 million** in ESSER II funds and **\$188.7 million** in ESSER III funds for return to school (RTS) and other Covid-related expenses. ESSER II funds are expected to be spent in three primary areas:

- Supporting summer school activities
- Indoor Air Quality (IAQ) and facility infrastructure improvements
- Technology leasing costs and TSSpec positions

\$33 million is allocated toward facilities infrastructure for HVAC and air quality improvements but will require Virginia Department of Education pre-approval (VDOE).

Funding from ESSER II, for facilities, will primarily focus on IAQ improvements at several FCPS facilities by modifying/replacing HVAC system equipment that are past their useful life, not utilizing current air conditioning industry standards, or do not have enthalpy control (e.g., cannot manage humidity and moisture). The various HVAC systems that will be upgraded or replaced include make up air units (MAUs), chillers, boilers, cooling towers, roof top units (RTUs), and air handling units (AHUs). All of these are critical components that contribute to good air quality.

Additionally, with ESSER II funding FCPS will be able to replace obsolete and antiquated building automation systems that control all the HVAC systems within a facility. By controlling when and how heating,

ventilating, and air conditioning systems operate, building automation systems save millions of dollars a year by reducing our energy consumption. They are also critical to ensure regular building ventilation for students, visitors, and staff from a central location, and provide good indoor air quality across the school division.

With an HVAC backlog of \$128.3 million, one that is projected to reach \$205 million by FY 2027, Facilities Management is prioritizing projects for replacement based on the following criteria:

- Likelihood of imminent failure
- Greatest impact on facility indoor air quality (IAQ)
- System criticality
- Manufacturer's recommended life expectancy

Using this criteria FCPS' Office of Facilities Management will work to utilize ESSER II funding to the greatest extent possible. One challenge, however, will be implementing planned infrastructure replacement projects, major maintenance projects, and ESSER-funded projects while simultaneously having the flexibility to adjust for unexpected equipment failures. All this work must be completed within the designated time frame set by the Federal Government of September 30, 2023.

County infrastructure funds that were previously identified for HVAC needs will be reallocated to other capital replacement projects as VDOE approves ESSER-funded HVAC projects. Below are FY2021-22 completed and planned projects:

OFM completed 15 projects in FY2021 using Infrastructure Replacement Funds. These projects include:

- 4 Asphalt replacement projects
- 4 Athletic infrastructure replacements projects
- 7 HVAC system replacements

OFM Planned projects in FY2022 using Infrastructure Replacement Funds. These projects include:

- 16 Asphalt replacement projects
- 5 Athletic infrastructure replacements projects
- 0 HVAC system replacements (all remaining HVAC Inf funds will be transferred to Asphalt)

The Facilities Planning Advisory Council (FPAC) advises the FCSB in areas concerning the development of a strategic, comprehensive, and long-term plans for facilities within the division. FPAC is intended to enhance community outreach and input into the facilities planning process.

FPAC suggests that its 2021-2022 Annual Charge from the School Board include continuing to work

with staff and build on our work to:

- Continue to develop the long-range vision for FCPS school facilities
- Provide further support to facilitate implementation of the accepted FPAC major maintenance and asset management recommendations
- · Further develop recommendations on facility resiliency, to include accessibility, sustainability, and design justice
- Advise and assist with the development and implementation of updated boundary policies and processes and identify any immediate capacity needs at specific schools
- Assess and evaluate how facility design and construction can become more functional within the classroom walls, incorporate a greater use of outdoor space, and enhance ventilation
- Review and update FPAC's charter and conduct a self-evaluation of work and process

Implementing the recommendations of OAG, FEA, and FPAC will ultimately improve the capital planning process to maximize the return on investment while decreasing asset failure rates and negative impact on facilities. Adequate funding of major infrastructure maintenance will help protect FCPS infrastructure investment while preventing failure of critical systems, deterioration of major capital investments, and significant health and safety hazards.

ENVIRONMENTAL SUSTAINABILITY AT FCPS

FCPS is one of the largest school districts in the United States. There are 225 facilities, including 200 K-12 schools and learning centers. The division has a long-standing commitment to take innovative and cost-effective steps to contribute to climate stabilization. In 2008 the FCSB adopted Policy 8542 on Environmental Stewardship. In 2013 the policy was revised to include collaboration with local and regional initiatives in an effort to produce an overall positive community impact on the environment. FCPS is committed to including students and staff members within the responsibilities of environmental stewardship by utilizing readily available critical-thinking and communication skills to determine the most appropriate measures for FCPS to take in this effort.

In October 2018, the School Board passed the Resolution on Climate Change Action calling for state and federal action on climate change. The resolution calls on the members of the Virginia General Assembly and the United States Congress to act on climate change and provide a regulatory framework that removes barriers to progress on climate action and encourages the rapid replacement of fossil fuels with renewable energy technology. It also directs the Superintendent to report in a timely manner to the FCSB any changes in state and federal policy that support the goal of reducing carbon consumption, along with staff proposals to make best use of those opportunities in facilities and transportation planning. In 2018, FCPS Regulation 8534 Energy Conservation Measures set guidelines for conserving energy in buildings and FCPS-operated vehicles.

POLICIES AND INITIATIVES

Policies and initiatives at FCPS are aligned with local, regional, and national goals for environmental stewardship. Most notably are those identified in the Metropolitan-Washington Council of Government's (MWCOG) Regional Climate and Energy Action Plan and the U.S. Department of Energy Better Buildings Challenge. Goals include energy intensity reduction of 20 percent over a 10-year period and of 80 percent by the year 2050. FCPS has reduced energy intensity over 18 percent in the first six years of the 10-year period. Both plans put forth commitments and recommended actions aimed at reducing the carbon impact of the built environment, including those related to energy usage and transportation, while increasing resiliency and improving education and outreach.

In addition to aligning with these goals, FCPS works closely with Fairfax County and its Environmental Vision which recognizes the responsibility to be good stewards to ensure a sustainable future. The vision focuses on two key principles: (1) to conserve our limited natural resources and (2) to commit to providing the resources needed to protect our environment. The Joint Environmental Taskforce (JET) made several recommendations that are outlined briefly later in this document. FCPS will be working to integrate those recommendations into FCPS policy and initiatives as we move forward.

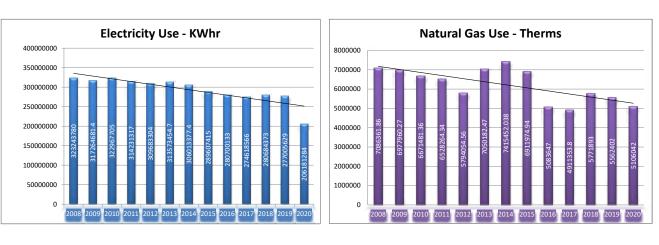

RESULTS OF ENERGY EFFICIENCY IMPROVEMENTS AND GREENHOUSE GAS REDUCTIONS

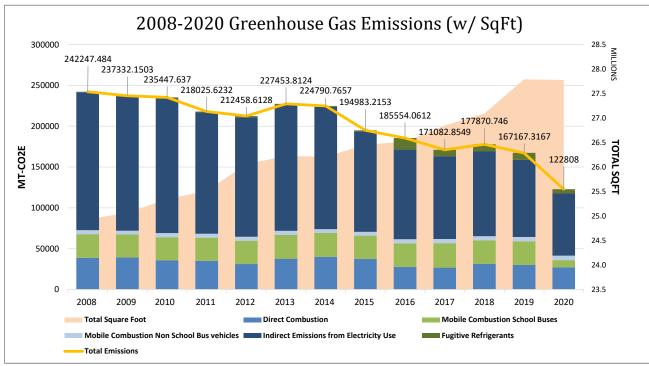

- Reduced Energy Use: As of the end of FY 2021, FCPS has reduced its total division-wide energy use by 18 percent as compared to Fiscal Year FY 2013.
- Savings from Energy Use Reductions: Cumulative energy cost avoidance of more than \$53 million has resulted from the reduced energy consumption since FY 2013.
- Reduced Greenhouse Gas Emissions (CO2e):
 - » FCPS emitted 122,808 metric tons of CO2e. This is a decrease in emissions from the FY 2019 inventory of 26.5%.
 - » From FY 2008 to FY 2020, GHG emissions have decreased 49.3% (COVID created unusual usage patterns and 2020 will likely prove to be an anomaly.)

The energy and CO2e reductions have been achieved despite the addition of 2,844,237 square feet since 2008. Another noteworthy anomaly is that the number of students in FCPS decreased by 8,811 from the year prior to 180,076 as of Sept 30, 2020.

RESOURCES | CIP FY 2023–27

233

Accomplishments in sustainability have been recognized by the Environmental Protection Agency (EPA):

- Energy Efficiency: FCPS earned the ENERGY STAR PARTNER OF THE YEAR award from the US Department of Energy in 2017 and 2018. In 2019, 2020 & 2021 FCPS earned the ENERGY STAR Partner of the Year—Sustained Excellence Award in recognition of its ongoing energy achievements. This award is given in recognition of superior energy and sustainability performance and practices.
- ENERGY STAR CERTIFIED School Buildings: All FCPS schools have been and continue to be benchmarked in the EPA ENERGY STAR Portfolio Manager website.
 - » ENERGY STAR Portfolio Manager is available to the public: https://portfoliomanager.energystar.gov/pm/login.html
 - » User ID: FCPSguest
 - » Password: VIEWonly!
- 185 FCPS facilities have earned an ENERGY STAR certification at least one time
- FCPS has earned a total of 673 ENERGY STAR certifications

ENERGY STAR AWARD 2021 PARTNER OF THE YEAR Sustained Excellence

DEVELOPING SUSTAINABLE CITIZENS THROUGH GET2GREEN

FCPS has a goal of graduating students as ethical and global citizens who are stewards of the environment. FCPS pursues this goal through Get2Green, the division's comprehensive environmental stewardship and sustainability program. Get2Green's mission is to promote student learning and action using the environment as a foundation. Initiatives are aligned with the goals of Student Success and Caring Culture in the FCPS Strategic Plan. Get2Green provides support for school-based teams working on hands-on environmental action to improve the sustainability of their school and community. Green teams are active at many schools with student-driven stewardship activities such as reducing waste, planting and maintaining wildlife habitats, conserving energy, and tending edible gardens. Some highlights of Get2Green's work include:

- Professional development provided to teachers working on school-based Get2Green activities to support them in leading students in hands-on environmental stewardship connected to the development of Portrait of a Graduate attributes.
- 139 FCPS Eco-Schools registered with the National Wildlife Federation Eco-Schools USA program (and an additional 35 schools interested in becoming Eco-Schools).
- 54 schools achieved awards through the Eco-Schools USA program, including the only schools nationwide with permanent Green Flag status (Katherine Johnson MS, Centreville ES, and Flint Hill ES).
- 89 schools with edible gardens (and an additional 41 schools interested in starting an edible garden).
- 118 schools with wildlife habitats containing plants native to Virginia (and an additional 30 schools interested in starting a wildlife habitat).
- Supported division-wide initiative to expand and maximize the use of outdoor learning spaces by providing professional development and guidance for schools.
- \$105,000 in grant funding acquired since 2018 to support student engagement in environmental stewardship activities, to expand equitable access to outdoor learning, to equip classrooms with water quality testing kits, and to offer the Grow at Home program for students to grow and harvest green beans. Grow at Home Kits were created in collaboration with Food and Nutrition Services. In summer 2020, 4,000 kits were distributed to 9,000 students at 63 meal distribution sites. In spring 2021, an kits were distributed to an additional 5,472 students through classes.
- FCPS Earth Week programming offered since 2018 to engage staff and students in simple and educational environmental stewardship activities on such topics as watersheds, consumption and waste, energy, biodiversity, and climate change.
- Recognized with County of Fairfax Team Excellence Award as collaborators on the Fairfax County Field Journal team.
- Communication improved with more than 10,000 subscribers to the monthly Get2Green newsletter and more than 950 followers to the @fcpsget2green Twitter account. The newsletter and Twitter platforms are used to share information about environmental stewardship initiatives, opportunities, and resources in FCPS.

One of the most notable accomplishments of the FCPS Get2Green team is the continued success of a public Get2Green website with school-specific energy and recycling data that went live in summer 2016. The website also includes guidance and resources for schools to engage in environmental stewardship activities.

REDUCTION OF ENVIRONMENTAL IMPACTS

FCPS has reduced the environmental impacts of facilities in the areas of energy usage, non-point source pollution, water conservation, and waste. The division is a charter member of the Collaborative for High Performance Schools (CHPS) and is following the Virginia CHPS Criteria (VA-CHPS) benchmark system for design and construction of high-performing and sustainable school buildings that are efficient, comfortable, environmentally responsible, and providing healthy spaces for learning.

The most energy-efficient building products, heating, and cooling system components, and lighting systems that the project budgets allow are included in school renovations, new construction, and equipment replacements. These include roofing, wall, and window components along with heating and cooling equipment such as condensing boilers and Energy Recovery Units (ERUs), and Variable Refrigerant Flow (VRF) systems. LED lighting and Automatic Temperature Control (ATC) systems that enable tight occupancy scheduling are also included. Design features in renovations and new construction include window designs that allow more controllable natural lighting in classroom spaces (eliminating the need for electric lighting at times), the reduction of glare and solar heat by Low E coatings and light shelves (less solar heat requires less cooling), occupancy sensors for lighting based on occupancy so lights are turned off when not in use, and de-lamping that reduces the number of light fixtures while providing appropriate lighting levels.

In older schools with components at or beyond useful life, equipment replacement includes ATC systems replacing existing temperature control systems, heating, and cooling equipment as mentioned above, and lighting improvements that include de-lamping, all to the extent budgets allow.

Measures FCPS utilizes to promote the reduction of environmental impacts in these areas follow.

Energy Conservation Measures Reducing Greenhouse Gas (GHG) Emissions:

• Net Zero Energy: The Joint Environmental Task Force (JET) was established in April 2019 as a result of a joint environmental collaboration between Fairfax County Board of Supervisors (FCBOS) and Fairfax County Public Schools (FCPS) following a joint Environmental Policy Meeting between the two Boards in 2019.

During a School Board meeting held in October 2020, JET recommended that Fairfax County government and School Operations commit to being energy carbon neutral by 2040. In addition, JET recommended that all new county buildings and major renovations beginning planning and design in 2021 and beyond must achieve Net Zero Energy (NZE) performance.

The Office of Design and Construction and the Office of Facilities Management collaborated with Perkins Eastman, an international architectural firm, to complete a Net Zero Energy (NZE) and Net Zero Ready (NZR) Study (www.fcps.edu/sites/default/files/Net-Zero-Energy-Study.pdf) in December 2020.

An NZE building is defined as one that is highly energy-efficient and produces onsite or procures offsite as necessary, carbon-free renewable energy in an amount sufficient to offset the annual energy use associated with operations. An NZE building is often developed with a highly insulated window design, high-performance insulation, and solar panels.

In comparison, a Net Zero Ready (NZR) building is designed and constructed in the same way as an NZE building, but without a renewable energy source to offset the energy consumed by the building. The NZR building is constructed to allow renewable energy sources to be added in the future.

On June 22, 2021, the Department of Facilities and Transportation presented responses to the JET recommendations (https://go.boarddocs.com/vsba/fairfax/Board.nsf/files/C3ZNC35AF95A/\$file/JET%20 Recommendations.pdf) to the Fairfax County School Board. The Fairfax County School Board accepted the recommendations during its July 15, 2021, public meeting.

- Behavioral Energy Consumption: FCPS launched a division wide energy management, conservation, and educational program in 2014. The program focused on organizational and behavioral changes to conserve energy, to save dollars to be reinvested in facility and equipment improvements. Since the expiration of the partnership, FCPS has incorporated the program into its Energy Management Section.
- Energy Efficient Roofs, Walls, and Windows: The building envelope is a very important part of the construction. Every dollar spent on it has a long-term effect on the building's energy efficiency. In addition to upgrading wall insulation, an air barrier product is used to make the wall even more efficient by reducing air infiltration. Double glazed, low-E windows with thermally insulated frames are installed. Reflective R-30 white gravel cool roof assemblies reduce the amount of solar heat reaching occupied spaces, reducing the cooling loads for HVAC equipment.
- Automatic Temperature Control (ATC): HVAC equipment is controlled by a computerized Automatic Temperature Control (ATC) system. It saves energy by stopping and starting equipment, setting temperatures back during unoccupied times, controlling the intake of fresh air, and it allows network access to help Energy Management manage efficiency and troubleshoot equipment without putting trucks on the road unnecessarily.
- Energy Recovery Units (ERU): Energy Recovery Units exchange heat energy between incoming unconditioned ventilation air and outgoing conditioned exhaust air. This exchange effectively preconditions the incoming air for cooling or heating, saving a corresponding amount of energy. (To maintain indoor air quality, fresh air must be added to occupied spaces and stale air removed. The volume of fresh air must match the volume of stale air exhausted.)
- Efficient Boilers: Conventional boilers are 80 percent efficient at best while condensing boilers are 90 percent+ efficient using natural gas. Conventional boilers allow most of the exhaust heat from combustion gases to escape while condensing boilers transfer/direct this heat to the spaces being heated instead.
- Efficient Chillers: Cooling occupied spaces is accomplished with magnetic bearing, water cooled, screw chillers that provide enhanced efficiency of chiller operation.
- Ground Source Heat Pumps (GSHP): Ground Source Heat Pumps heat and cool using the constant temperature of the earth extracted from wells hundreds of feet deep for the source of heat transfer. This improves the efficiency of the heat pump technology. GSHP is a fundamental element of many Net Zero Energy designs.
- Variable Refrigerant Flow (VRF) systems: VRF units work only at the rate needed allowing for energy savings at load conditions. In addition to the improved efficiency, interior temperatures in rooms can be controlled individually instead of being included in larger zones.
- Variable Frequency Drive (VFD): VFDs are installed on large HVAC equipment to control the speed of the motors in response to system demand. This feature prevents pumps and fans from running at full speed when they do not need to, thus saving energy.
- ECM motors (Electronically Commutated Motors): These motors are specified for pumps and fans to reduce electricity use during operations. They adjust the power of the motor in response to changing load conditions to maintain work output.
- Electrical Plug Load: FCPS uses power management controls of computers and the installation of ENERGY STAR rated walk-in coolers, ovens, ice makers, refrigerators, and holding/proofing cabinets in school kitchens (Electrical plug load is the electricity required to operate equipment plugged into electrical outlets, such as computers and appliances).
- LED Lighting: Highly efficient LED lamp fixtures are installed in interior spaces, replacing fluorescent and incandescent to reduce electricity use. LED lamp fixtures are also used for exterior lighting (building exterior, parking lots, sidewalks, athletic fields, etc. LED lamps consume 80 percent less electricity than incandescent lamps.

- Lighting Based on Occupancy: Occupancy sensors are installed in classrooms to help ensure that lights do not remain on when a room is empty. Multi-level switches in classrooms allow occupants to control levels of lighting in combination with natural light to save electricity.
- **De-Lamping:** Numbers of lighting fixtures and/or numbers of lamps in fixtures are eliminated to reduce energy use while maintaining the same or improved quality of lighting.
- **Daylighting:** Every effort to introduce natural light into each classroom and large spaces such as libraries, lobbies, and gyms to improve the quality of lighting and reduce electricity use is made during design. Daylighting is achieved through design features such as window sizes, Low E coatings, placement, shades, light shelves, skylights, and solar light tubes.
- Grounds Equipment: Gasoline powered equipment is being replaced with diesel powered equipment adhering to EPA's Tier 4 (T4) emission standard when equipment is due for replacement. Tier 4 engines include after treatment devices such as diesel oxidation catalysts (DOC) and DPF to further reduce FCPS environmental impact.
- Transportation:
 - » As vehicles require replacement, preference will be given to those with electric alternatives, hybrids, and those with improved fuel economy to provide better air quality throughout Fairfax County.
 - » School bus routes are designed to provide safe, on time, efficient, child and program appropriate student transportation.
 - » OTS is currently evaluating electric school bus technology to determine whether these vehicles will meet the operational requirements/expectation for providing safe, reliable, and efficient transportation for our students.
 - » OTS continues to monitor opportunities and apply for grant funding and was recently awarded funding through DEQ's "Clean School Bus Program" to replace ten (10) diesel school buses with electric.
 - » OTS recently established a Request for Information (RFI) to identify suitable solutions and associated costs to facilitate the conversion of the current school bus fleet to electric along with the installation of the relevant charging infrastructure.

Water Conservation Measures Reducing Consumption:

- Efficient Plumbing Components: Significant reductions in water consumption by occupants result from the installation of EPA WaterSense qualified faucets, toilets, urinals, and sensor type faucets. These toilets use 0.5 gallons per flush (GPF) and Urinals. 0.125 GPF rather than the higher Federal plumbing standards of 1.6 gallons per flush (GPF) for toilets. Many older toilets use as many as 3.5, 5, or even up to 7 GPF.
- Reducing Irrigation:
 - » Installation of cisterns has been done on FCPS school sites on a small scale for local irrigation of landscaping, and on a large scale for irrigation of natural turf athletic fields. A cistern is a collection facility to hold rainwater for later use, typically for irrigation, and to control the flow of water into a storm sewer (The Marshall HS cistern has a capacity of about 335,000 gallons of storm water).
 - » Replacement of natural turf athletic fields with artificial turf eliminates the need for irrigation. The artificial turf fields also eliminate the Greenhouse Gas Emissions produced by motorized mowing and landscaping equipment required by natural turf.
- **Rain Barrels:** Schools maintaining their own gardens typically use rain barrels rather than municipal water for spot watering plants. FCPS facilitates the acquisition and installation of the rain barrels.

Environmental Pollution Reducing Measures:

- **Recycling:** FCPS coordinates its recycling with Fairfax County Department of Public Works and Environmental Services. Plastics numbered 1 and 2, paper, cardboard, and aluminum and tin cans are required to be collected at schools, offices, and support facilities for recycling. The designation of these materials is based on what materials are being accepted for recycling at this time.
- Reducing Plastic Waste from Water Bottles: Water bottle filling stations allow school occupants to refill water bottles rather than putting them into the recycling or trash streams. The stations are well used by environmentally aware students. Just one of the water bottle filling stations located in George C. Marshall High School keeps over 40,000 bottles out of the recycling or trash streams every year.
- **Repurposing Existing school Building Structure:** Construction waste materials are separated and recycled, reused, or repurposed as much as possible. Wherever possible during renovations and expansions, existing building structures are retained and repurposed to reduce construction costs and the volume of demolished construction materials that must be either salvaged, recycled, or sent to the landfill for disposal.

- **Regionally Sourced Building Materials:** Using regionally sourced building materials and other products along with local recycled content and rapidly renewable construction materials to the degree possible.
- Controlling Point Pollution from Storm Water Runoff: A substantial percentage of the cost of a construction project goes towards storm water management. In addition to meeting the PFM requirements, FCPS partners with the Fairfax County Storm Water Planning Division (SWPD) to enhance storm water management beyond what is required at a Bond funded project. FCPS also coordinates with the SWPD when there are opportunities at schools not undergoing renewals. FCPS Bond construction projects have many storm water control elements, such as:
 - A. **Improved Water Infiltration into the Ground:** The soils in our area typically do not allow water to infiltrate into the ground very rapidly. To encourage storm water to percolate into the ground and replenish the ground water system, soil amendments are used where practical to increase storm water infiltration. Organic material is tilled into the soil to help offset the effect of the clay typically found in the soil in our area.
 - B. Storm Water Detention: This type of facility collects and stores runoff from parking lots and fields, releasing it slowly into the storm sewer system. At sites where an adequate infiltration rate is present, the facility can also release water for infiltration into the ground. Parking lots, landscaping, walkways, and fields are usually installed over an underground storm water detention facility.
 - C. **Reforestation:** The reforestation of areas on school sites helps mitigate storm water runoff by absorbing water. Drought-resistant trees and plants native to this region are used because they are suited for this climate and do not require irrigation. The trees absorb carbon dioxide and assist with improved air quality around the schools. Over 1,500 trees and over 4,100 shrubs were planted by FCPS in the past two years. With few exceptions, only native and non-toxic fruit-bearing vegetation was planted. No invasive species were planted, and in most cases, existing invasive species are removed using procedures prescribed by Fairfax County's Urban Forest Management Department.
 - D. Bio Swales and Dry Ponds: A dry pond and a bio swale store storm water and allow water to simultaneously infiltrate into the ground with excess water during heavy rains being released slowly into a storm sewer system. They drain until empty. Trees, plants, and grasses provide filtering of released water, reducing pollution. Dry ponds are less desirable than other more expensive options because the land is devoted to just one purpose and cannot do "double duty" as underground options can.
 - E. Filterras: A Filterra is an engineered bio-filtration system filled with a filter media to filter pollutants out of storm water runoff before it enters the main part of the storm sewer system. Storm water runoff enters Filterra system and flows through a specially designed filter media mixture that captures and immobilizes pollutants. Pollutants are then decomposed, volatilized, and incorporated into the biomass of the Filterra system's micro/ macro fauna and flora.
 - F. Pervious Hard Surfaces: Pavement, concrete, and pavers that allow rainwater to soak through and infiltrate into the ground rather than run off are being installed in appropriate locations. A very important location is vehicle parking areas because contaminated water infiltrates the ground rather than flowing directly into storm sewers.
- **Reduction of Light Pollution:** LED exterior and parking lot light fixtures are designed and positioned to eliminate general light pollution and to shield wildlife living in adjoining natural areas from light trespass.
- Indoor Environmental Quality (IEQ): High efficiency filtration media are used to filter air in occupied spaces of the schools. Also, Demand Control Ventilation based on humidity is installed in key areas. Ventilation in high occupancy areas such as gymnasiums, cafeterias, and libraries are controlled by the levels of CO2 in those spaces to help assure improved IEQ.

- Low Volatile Organic Compound (VOC) emitting materials and paints: Low VOC construction components plus furniture, carpets, and paints are selected for reduced indoor pollutants due to reduced off-gassing of VOCs.
- Green Cleaning: Green cleaning products and procedures are practiced minimizing negative effects on IEQ and help protect the health of employees and students. FCPS utilizes microfiber cleaning cloths, treated dust mops, Green Seal certified cleaning chemicals, HEPA vacuums, dust collecting burnishers, as well as walk-off floor matting. FCPS adheres to more stringent indoor air quality standards than are required by the Environmental Protection Agency (EPA).

RENEWABLE ENERGY—SOLAR AND GEOTHERMAL

FCPS has been a leader in Virginia in the utilization of solar energy since the 1970's when the division constructed the first schools on the East Coast to utilize solar panels as an energy source (Terraset and Terra Centre Elementary Schools). Currently, there are ten solar installations on FCPS facilities: a total of seven photo-voltaic solar arrays at Bailey's ES, Canterbury Woods ES, Twain MS, Centreville ES, Rachel Carson MS, Thomas Jefferson HS, Frost MS, and Franklin Sherman ES. and three roof-mounted installations for solar thermal heating of potable water at Glasgow MS, West Springfield HS, and Thomas Jefferson HS. In addition to solar, FCPS also has one geo- thermal installation at Mason Crest ES, and a wind turbine installed at Katherine Johnson MS. These projects highlight division wide enthusiasm toward renewable energy and provided excellent hands-on educational tools for science, technology, engineering, and mathematics (STEM) subjects taught to students.

In 2015, Power Purchase Agreements (PPAs) were becoming attractive as costs of solar power generation equipment fell and electric utility rates increased. FCPS conducted feasibility studies to determine the environmental and economic benefits. With a Power Purchase Agreement, a solar PPA company installs solar equipment and maintains the solar system while the PPA client pays for solar power generated at agreed-to electricity rates instead of paying a utility for non-renewable power. It was determined that electric rates associated with PPA solar power generation were still too high in 2015. By 2019 electric rates declined, and FCPS Partnered with Fairfax County Government in a Solar PPA.

FCPS has begun steps to implement a Solar Power Purchase Agreement (www.fairfaxcounty.gov/cregister/ ContractDetails.aspx?contractNumber=4400009516) in cooperation with the Fairfax County partnership.

Renewable power generation, particularly solar panel installations during the Net Zero Energy school design and the Solar Power PPA, will remain a high priority for FCPS for the foreseeable future.

FAIRFAX COUNTY PUBLIC SCHOOLS EDUCATIONAL SPECIFICATIONS CHANGES

Educational Specifications (EdSpecs) are criteria for spaces in schools that support the implementation of the instruction program approved by the School Board. The criteria identify basic educational and support spaces to be included in school buildings when they are designed. Fairfax County School Board Policy 8230, School Design, sets the requirement for educational specifications. FCPS has EdSpecs for elementary schools, middle schools, high schools, and special education spaces. Each one prescribes the appropriate spaces to be included, the quantity, their size, capacity, how each space is outfitted, and the appropriate location within a school. FCPS strives for precise facility planning to ensure adequate physical space for students, staff, and programs. These guidelines are a critical component as a school goes through a renovation, new programs are offered in facilities, and when there are capacity concerns. The EdSpecs serve to ensure equitability across the school portfolio, ensuring each school is designed to the most up-to-date design standards. Schools going through a renovation are designed to the EdSpecs in effect at the time of design. These specifications continually adapt to meet current practices and guidelines set by the state.

EdSpecs are reviewed to follow current state guidelines and best practices every two years in conjunction with the bond cycle. School Board Regulation 8120 sets forth a review by a working group. The Instructional Services Department (ISD), in cooperation with the Department of Facilities and Transportation Services (FTS), the Department of Information Technology (DIT), selected principals, instructional staff members, and consultants, shall meet periodically to review the educational specifications and recommend changes based on current approved educational programs. Newly added educational specification items are implemented in the preceding bond cycle via the Capital Improvement Program (CIP).

CHANGES

The following changes to the EdSpecs are set for implementation after adoption of the 2021 Bond. Detailed information these changes will be included in the EdSpecs 2021 document.

KEY	TITLE	DESCRIPTION		
А	Floor Finish Update in Team Rooms at High Schools	Floor finish in Athletic P.E. Locker Room Complex team rooms to be changed from vinyl composition tile (VCT) to ceramic floor tile.		
В	Folding Partitions	Manual folding partitions at all instructional level classrooms (ES, MS, HS), and elementary school stages (wherever feasible). Motorized folding partitions may remain at certain large areas in high schools.		
С	All Gender Group Toilet Facilities Private stalls with full-height walls in all group toilet locations (ES, MS, HS)			
D	Markerboard Heights at Elementary and Middle Schools Increase mounting heights of markerboards (ES, MS).			
E	Outdoor Classrooms	Outdoor instructional teaching areas including fixed seating, paved walking areas, electrical outlet, and plumbing hose bib (ES,MS,HS).		
F	Restroom Signage	Restroom signage as "toilet", not specific to staff, men's, women's.		
G	Reduction of Corridor Lockers in Middle and High Schools	Reduce locker count to 50% of the design capacity (MS) and 25% of the design capacity (HS).		
Н	Reflection/Prayer Room	Provide designated interior space for students and staff for reflection (ES,MS,HS).		
I	Technology & Engineering Square Footage Reduction	Adjustment to square footage of some lab and storage space in Technology & Engineering (HS).		

INVENTORY OF SPECIFIC SPACES BY SCHOOL

The School Board has requested an inventory of specific spaces in FCPS facilities to accommodate Prayer/ Reflection Rooms, All-Gender/Single-User Toilets, Private Changing Areas, and Lactation Support Spaces. The Department of Facilities and Transportation Services requested school principals identify spaces reflected above and has collected the existing conditions and collaborating with the Department of Special Services and the Department of Human Resources, which oversee the implementation of the School Board policies and regulations applicable for these spaces.

This existing conditions inventory is a starting point of what is spaces are provided at schools and facilities and will be improved upon with incorporation the additional spaces in the 2021 Educational Specification changes and as population needs change at individual schools.

Below is a summary of the Policies and Regulations that address each space followed by a list of explicitly identified spaces.

Prayer/Reflection Rooms

One policy and two regulations that specifically relate to religion:

- Policy 1460, Religion
- Regulation 1461, Religion
- Regulation 4817, Religious Leave (for employees only)

Other governing documents are:

• Regulation 2601, Student Rights and Responsibilities

All-Gender/Single-User Toilets and Private Changing Areas

One regulation specifically relates to all-gender/single-user toilets and private changing areas:

• Regulation 2603, Gender-expansive and Transgender Students

Other governing documents are:

• Regulation 2601, Student Rights and Responsibilities

Lactation Support Spaces

One policy and two regulations that specifically relate

- Policy 4425, Lactation Support Programming
- Regulation 2137, Instructional Services for Pregnant, Parenting, and Lactating Students

Source: FCPS, Facilities Planning Services, *Capacity and Utilization Surveys*, SY 2021-22. *Indicates a shared space.

Notes:

- 1. Shared spaces were counted as one designated space.
- 2. Includes toilets designated as all-gender/single-user toilets.

3. In classroom single-user toilets not designated were not included.

4. Schools currently in construction not included due to ongoing facility changes.

APPENDIX

SCHOOLS AND CENTERS

Notes:

* Indicates a City of Fairfax School (facility owned by the City of Fairfax but is staffed and maintained by FCPS)

YEAR OPENED lists the year the facility opened with additional notes (where applicable).

CAPACITY ENHANCEMENT lists

the year of the latest building addition or modular installation.

RENOVATION year is the lastest renovation to the facility.

FUTURE SF is provided for those facilities identified for a renovation or addition, if available.

INSTRUCTIONAL AREA denotes the gross square footage dedicated to student instruction and instructional support within a facility.

BUILDING identifies the gross square footage of the structure.

MODULAR identifies the gross square footage of a modular building.

MODULAR CLASSROOMS

lists the number of classrooms located within a modular building

TEMPORARY CLASSROOMS

lists the gross square footage and number of classrooms.

FEEDER SCHOOLS lists schools: to or from which students progress

GLOSSARY

ADDITION

Permanent construction that adds square footage to a school and is subject to all Fairfax County zoning, building codes, and permitting processes.

ADMINISTRATION (SPACE)

Spaces which support the administrative staff such as: offices, work rooms, and storage.

ADVANCED ACADEMIC PROGRAM (AAP) CENTER

A school that has been identified to educate students who qualify for Level IV Advanced Academic Services in FCPS on a full-time basis, to receive a challenging instructional program in the four core subject areas. Students in this program are grouped together for their core instruction by grade level.

ADVANCED ACADEMIC PROGRAM LOCAL LEVEL IV PROGRAM (NON-CENTER BASED)

A program that provides students another avenue to access advanced academic services in their base school. Center-eligible students, who choose to remain in their local school, receive the same advanced academic curriculum as students who attend centers. Depending on the number of eligible students at the local school, a student will attend classes with other eligible students and/or other high achieving students. This was previously known as the "Gifted and Talented Program."

ALTERNATIVE SCHOOL PROGRAMS

A variety of intervention and support programs for students at risk for expulsion for inappropriate behavior, students conditionally expelled, and students whose adjustment to traditional education interferes with successful participation in general education.

ATTENDANCE ISLAND

A geographic area that is assigned to a school within a particular boundary, although the area is not contiguous to the school boundary.

ATTENDING SCHOOL

School at which students attend although they may be assigned to a different school (base school).

BASE SCHOOL

School to which students are assigned based upon the school boundary in which they reside, although they may be attending a different school (attending school).

BIRTH TO K RATIO

A ratio comparing the number of births at a point in time and the kindergarten student membership five to six years later. Students are eligible for kindergarten when they have turned five years old prior to September 30th of any given school year. Consequently, the timeframe between birth to kindergarten can be between five and six years.

BUILDING LIFE CYCLE

Life span of a building in which all components of the construction operate efficiently and meet the requirements of the occupants. Construction components include mechanical, plumbing, electrical; heating, ventilation, and air conditioning (HVAC); and architectural installations.

CAPACITY DEFICIT

Term used when referring to a school with a greater membership than program capacity; these schools could be referred to as "overcrowded."

CAPACITY ENHANCEMENT

A capacity solution that provides additional classroom space to increase capacity; includes additions, modular, and temporary classrooms.

CAPACITY SURPLUS

Term used when referring to a school with a membership less than 85 percent of program capacity.

CAPITAL BUDGET

Manages funding for school construction projects, which can include new construction, renovations, capacity enhancements, and site acquisitions. The primary source of funding for capital budget is the sale of general obligation bonds authorized by the voters in the bond referendum.

CAPITAL CONSTRUCTION CASH FLOW

Details how much money has been spent on each of the listed projects, how much approved bondfunded money is planned to be spent in the future, and how much unfunded money (from future bonds) is needed to complete all projects. The Capital Construction Cash Flow order is based on the Renovation Queue status order along with projects that are needed to accommodate expected student membership growth.

CAPITAL IMPROVEMENT PROGRAM (CIP)

The Capital Improvement Program (CIP) annually evaluates current and projected student membership with capital facilities data to identify future capital needs for new construction, capacity enhancements, and facility renovations. The CIP document is used as a basis for the determination of timing and scope of projects to be included in proposed bond referenda.

CAPITAL IMPROVEMENT PROJECTS

Projects that include new construction, capacity enhancement, facility renovation, and site acquisition.

COHORT

A group of students who are educated during the same period of time—a grade level or class.

CORE (SPACE)

Mandatory learning spaces such as primary, elementary, and self-contained special education classrooms; required classes in middle and high school.

DEBT CAP

The maximum amount that a local government can borrow without resulting in a need for a reduction in credit rating. Established for FCPS by the Fairfax County Board of Supervisors (FCBOS) at \$180 million (M) annually, with an increase of \$25M for FY 2023 and FY 2024, followed by a \$50M increase every year thereafter, resulting in an annual total of \$230M.

DESIGN CAPACITY

The number of students a building can accommodate based upon the original design of the building. The design capacity remains constant until a school undergoes a renovation or an addition.

DEVELOPMENT CENTER

A geographic area identified by the Fairfax County Comprehensive Plan where future development, including new housing, will be encouraged.

DIVISIONWIDE COMPREHENSIVE PLAN (DWCP)

The DWCP is consistent with, and is included within, the Virginia Board of Education Comprehensive Plan. The DWCP includes a forecast of enrollment changes and a plan to accommodate future enrollment, including the consideration of consolidating schools, to provide for a more effective delivery of instructional services to students and economies of scale in division operations. A report is presented by the Fairfax County School Board to the public by November 1 of each odd- numbered year describing the extent to which the objectives of the DWCP have been met during the previous two school years.

EARLY CHILDHOOD CLASS BASED (ECCB) SERVICE

A program that provides special education instruction in a classroom setting for children ages two through five who qualify under the Individuals with Disabilities

Act. The program is located in a number of elementary schools within FCPS and emphasizes communication, early literacy, and social development.

EARLY HEAD START (EHS)

A full-day early childhood program for children up to two years of age providing comprehensive services to income-eligible families and expectant mothers living in Fairfax County.

Explicit requirements mandated by the Virginia Department of Education and the FCSB that have been deemed necessary to accommodate students, including minimum square footage for instructional areas by program and school level.

EDUCATIONAL SPECIFICATIONS

Explicit requirements mandated by the Virginia Department of Education and the FCSB that have been deemed necessary to accommodate students, including minimum square footage for instructional areas by program and school level.

ENGLISH SPEAKERS OF OTHER LANGUAGES (ESOL)

A program for students who speak another language to become proficient in English in order to function successfully in the general education program.

F

FACILITIES AND MEMBERSHIP DASHBOARDS

Information about student membership and the use of school facilities at FCPS is displayed on the FCPS website. Dashboards have been created to include data related to student membership, birth to kindergarten ratio, student transfers, temporary classrooms, capacity utilization, renovations, and new construction projects which are identified in the CIP.

FACILITIES PLANNING ADVISORY COUNCIL (FPAC)

FPAC provides advice to the Fairfax County School Board (FCSB) with regard to the development of strategic, comprehensive, and long-term plans for educational facilities. The FPAC is intended to enhance community outreach and input into the facilities planning process. An annual report is submitted to the FCSB and it includes recommendations to aid in future facilities planning efforts.

FAIRFAX COUNTY BOARD OF SUPERVISORS (FCBOS)

Consists of nine members elected by magisterial district, plus a chair elected at-large. Establishes county government policy, passes resolutions and ordinances (within the limits of the authority established by the Virginia General Assembly), approves the budget, sets local tax rates, approves land use plans, and makes appointments to various positions.

FAIRFAX COUNTY SCHOOL BOARD (FCSB)

Consists of nine members elected by magisterial district plus three elected members at-large. Sets general school policy and establishes guidelines that will ensure the proper administration of the Fairfax County Public Schools programs.

FCPS PRE-KINDERGARTEN (PreK)

A full-day preschool program for children three to four years of age providing comprehensive services to income-eligible families living in Fairfax County. Local funds are braided with Virginia Preschool Initiative and Virginia Preschool Initiative Plus grant funds.

FEEDER SCHOOL

School progression to which or from which students are assigned.

FISCAL YEAR (FY)

A 12-month period used for accounting and reporting purposes and preparing financial statements in an organization. FCPS' financial year encompasses the 12 months beginning July 1 and ending the following June 30.

FIVE-YEAR PROJECTION

Estimated membership numbers for the five-year planning period that are utilized by the Office of Facilities Planning Services to create a needs assessment upon which the schedule of capital projects is based.

FREE AND REDUCED-PRICE MEALS (FRM)

Program for children whose household income meets the level to qualify free or reduced priced meals at a price set by the Federal Government.

GENERAL EDUCATION PROGRAM

Virginia Board of Education required program of instruction that meets the Standards of Learning, including English, mathematics, science, history/ social science, technology, the fine arts, foreign language, health and physical education, and driver education.

GENERAL OBLIGATION BOND REFERENDUM

A future obligation for taxpayers who vote to approve or deny general obligation bonds, which are backed solely by the credit and taxing power of the issuing jurisdiction rather than the revenue from a given project like other municipal bonds. The most recent school bond referendum was approved by county residents in November 2021.

GIFTED AND TALENTED CENTER

See ADVANCED ACADEMIC PROGRAM (AAP) CENTER

GIFTED AND TALENTED PROGRAM

See ADVANCED ACADEMIC PROGRAM LOCAL LEVEL IV PROGRAM (NON-CENTER BASED)

Η

HIGH SCHOOL ACADEMY

A center within an existing high school that offers advanced technical and specialized courses that successfully integrate career and academic preparation.

HIGH SCHOOL PYRAMID

Group of schools located geographically within each high school boundary. At the top of each pyramid is one high school, followed by one or more middle schools, then multiple elementary schools. Each lower school level of the pyramid generally feeds into the one above.

IMMERSION PROGRAM

Education program of acquiring a world language through content-based instruction.

INFRASTRUCTURE FINANCING COMMITTEE (IFC)

A joint FCSB/FCBOS committee established in April 2013 as a working group to collaborate and review both county and School Capital Improvement Programs and capital requirements.

INFRASTRUCTURE REPLACEMENT AND UPGRADES

The planned replacement of building subsystems that have reached the end of their useful life. These systems, once replaced, will typically endure for more than 20 years. Without significant reinvestment in building subsystems, older facilities can fall into a state of ever-decreasing condition and functionality, and the maintenance and repair costs necessary to operate the facilities increase.

Currently these types of infrastructure replacement and upgrades are funded within operational budgets or financed using municipal bonds.

IN-MIGRATION

Number of new students (excluding kindergarten) when comparing the membership of one school year to the membership of the previous school year. (See also OUT-MIGRATION)

K-3 CAP

State and locally funded Primary Class Size Reduction Program to establish maximum individual class size and pupil-teacher ratio in kindergarten through third grade for raising student achievement in high poverty schools.

MEMBERSHIP

An official count of active students at a snapshot in time. For CIP reporting purposes, September certified membership numbers are used.

MIGRATION

A term used to refer to students new to FCPS (inmigration) and students who did not return to FCPS (out-migration).

MODULAR CLASSROOMS

Prefabricated buildings that are constructed off site in a factory and transported to school grounds to provide additional classroom space to accommodate students. They are portable, can be relocated, and typically are ready for use 30-60 percent faster than on-site built construction. Modulars sit on a permanent foundation. They have plumbing, interior corridors, and bathroom facilities. Modular additions are included in the calculation of school design and program capacity.

Ν

NET MIGRATION

The difference between the number of students new to FCPS (in-migration) and the number of students who did not return to FCPS (out-migration).

NET TRANSFER

The difference between the number of students that attend a school in a different boundary (transfers-in) and the number of students that are assigned to a school based upon the school boundary in which they reside but attend a different school (transfers-out).

NEW CONSTRUCTION

Construction of a new facility or expansion of an existing facility with no other renovation work performed on an existing building or buildings. New construction is typically financed through municipal bonds. Projects that are considered when significant capacity deficits are likely to persist over time. Although this is the costliest method of accommodating student growth, it is an important option when capacity needs cannot be met within a given area of the school system.

OPERATING BUDGET

This budget provides for the day-to-day operations and maintenance of the schools and is funded primarily by county and state funds. At times, operating funds are used to relieve overcrowding at school facilities through interior modifications and trailers to accommodate students.

OPERATIONS AND MAINTENANCE

The recurring, day-to-day, periodic, or scheduled work required to preserve control deteriorationand provide for the basic operation of a facility. This type of maintenance is routine and is based on frequency schedules, responding to service requests, or through periodic inspection and correction efforts. Operations and maintenance are typically funded through operational budgets.

OUT-MIGRATION

Number of students who did not return (excluding 12th grade students) when comparing the membership of one school year to the membership of the previous school year.

OVERCROWDED

(See CAPACITY DEFICIT)

PHASING OF ADJUSTMENTS

Carrying out changes to a school boundary in gradual stages, generally by a grade or set of grades at a time. FCPS Policy 8130 titled "Local School Boundaries, Program Assignments, and School Closings" governs and provides the details of the Phasing of Adjustments.

PRESCHOOL AUTISM CLASSES (PAC)

Preschool Autism Class (PAC) services are designed with a reduced adult to student ratio and provide systematic instruction in a highly structured setting to maximize learning. PAC services are designed to address the specific needs of preschool-age children who have been identified as having Autism Spectrum Disorder or present characteristics on the autism spectrum, and who cannot benefit from the early childhood class-based program.

PROFFER

A proffer is a voluntary proposal submitted to a locality by applicant requesting a change in zoning to mitigate the impacts to public facilities, including schools, that would be generated by the requested use. Proffers can address both on-site and offsite impacts and once proffers are accepted, they become a part of the zoning regulations. These regulations are applicable to the property unless subsequently changed by a zoning concept plan amendment or by a new zoning map amendment.

PROGRAM CAPACITY

Capacity based on the number of existing core classrooms and the specific unique programs assigned to a school that differ from the original design of the building. This capacity is recalculated every school year based on the program changes.

PROGRAM CAPACITY UTILIZATION

Percentage of program capacity that is utilized by the total student membership within a school. In this CIP the terms "capacity utilization" and "program capacity utilization" are used interchangeably.

R

REGION

An administrative geographic boundary that contains multiple high school pyramids and alternative schools and centers. Five regional offices provide support to school facilities and communities within each relative boundary.

RENOVATION

Renovations are aimed at ensuring that all schools are able to accommodate current educational programs. Renovations are performed on a facility to replace all outdated building subsystems and to alter, modernize, expand, or remodel the existing space.

RENOVATION QUEUE

The queue was approved by the FCSOB in 2009, based on the priority listing provided by independent architectural and engineering firms in 2008.

S

SCHOOL AGE CHILD CARE (SACC)

Sponsored by the Fairfax County Office for Children, SACC provides school-based before and after-care school for elementary school children.

SCHOOL YEAR (SY)

The school year consists of 180 days and is established by the FCSB in accordance with FCPS Regulation 1344, Standard School Year Calendar.

SPECIAL EDUCATION LEVEL 1 SERVICES

Level 1 services refer to the provision of special education and related services to children with disabilities for less than 50 percent of their instructional school day (excluding intermission

for meals). The time that a child receives special education services is calculated based upon special education services described in the Individualized Education Program (IEP), rather than the location of services. The student membership projections and historical membership reports include these students in the grade level projections.

SPECIAL EDUCATION LEVEL 2 SERVICES

Level 2 services refer to the provision of special education and related services to children with disabilities for 50 percent or more of the instructional school day (excluding intermission for meals). The time that a child receives special education services is calculated based upon special education services described in the Individualized Education Program (IEP), rather than the location of services. The student membership projections and historical membership reports include these students in the column entitled "Special Education."

SPECIAL EDUCATION PROGRAMS

Specially designed instruction to meet the unique needs of children with impairments or disabilities. Special education services may include, but are not limited to, preschool autism, autism, intellectual disabilities, deaf or hard of hearing, blind and visually impaired, or physical disabilities. A continuum of services is available at every school and comprehensive services are provided at selected sites.

SPLIT FEEDER

A term to describe a particular school from which students progress to two or more higher-level schools. For example, when an elementary school boundary intersects the school boundary of two middle schools.

STANDARDS OF QUALITY (SOQ)

The SOQ serves as the foundation program for public schools in Virginia and is reviewed approximately every two years. School divisions are required to maintain an educational program meeting the SOQ.

STUDENT YIELD RATIO

A ratio that is derived from dividing the number of students by the number of housing units (by

type) in an existing specified area. When used for student enrollment projections, this ratio helps in determining the number of students expected to come from new housing. For example, a housing development with 20 single-family attached housing units would yield five elementary school students, having a student yield ratio of 0.25 elementary school students per single-family attached housing unit.

SUPPLEMENTAL (SPACE)

Locally mandated enrichment spaces in elementary schools, such as music, and art; this type of space is considered elective in middle and high schools.

SUPPORT (SPACE)

Spaces other than instructional space such as cafeteria, toilets, locker rooms, and media center.

TEMPORARY CLASSROOMS

Trailers that are installed at school sites on permanent foundations, without connection to public plumbing utilities, to provide additional classroom space. This type of classroom is not included in the calculation of school design capacity or program capacity but is included in instructional space if it is being used as such.

TITLE I

Title I is a federal aid program established "to provide all children significant opportunities to receive a fair and equitable high-quality education, and to close educational achievement gaps." Elementary schools with the highest percentage of students eligible for free and reduced price meals receive funds for staffing and other resources to meet the needs of students and families.

TRANSFER STUDENTS

Students who reside within one school boundary are assigned to that base school but attend another school within a different school boundary (attending school). The transfer process within the school district is completed pursuant to FCPS Regulation 2230. Students shall attend the school that serves their attendance area, or boundary, unless FCPS determines that a different instructional program is required to meet their needs.

TRANSITION SUPPORT RESOURCE CENTER (TSRC)

A short-term intervention program, typically one semester to one year in length, located within some FCPS schools. The focus of the program is to improve each student's academic performance and help with successful re-entry into their next educational placement.

W

VALUE ENGINEERING

A cost evaluation technique based on a systematic analysis of the functions of a project to identify unnecessary, high costs and to eliminate or modify elements that add cost to the project without contributing to its required function.

VIRGINIA PUBLIC SCHOOL AUTHORITY (VPSA)

The VPSA consists of the State Treasurer, the State Comptroller, the SPI, and five additional members who are appointed by the Governor. The VPSA operates several financing programs for public primary and secondary education and is established via Section 22.1-162 et seq. of the Code of Virginia.

VIRGINIA DEPARTMENT OF EDUCATION (VDOE)

VDOE is the administrative agency for Virginia public schools.

VIRGINIA BOARD OF EDUCATION (VBOE)

Administers the free public elementary and secondary school system and prescribes Standards of Quality (SOQ) for public schools; adopts the Board of Education Comprehensive Plan.

Department of Facilities and Transportation Services 8115 Gatehouse Road, Falls Church, VA 22042
