STANDARDS OF ACCREDITATION GROWTH REPORT
Standards of Learning Growth Outcomes

To the Parents/Guardians of: _____ SID: _____

This letter provides information about your student's growth on state assessments so you can join us in celebrating their learning. Earlier this summer, we shared an official Standards of Learning (SOL) or Virginia Alternate Assessment program (VAAP) score report. That report showed the overall test scaled score and performance level for each of your student's spring SOL or VAAP tests.

Even though your student did not earn a proficient score for reading and/or mathematics on their spring test, their performance improved from previous state tests. This means your student is closer to meeting grade level standards. Virginia recognizes this growth when measuring school success for the Standards of Accreditation (SOA).

Your student met state SOA growth targets in: _____ [Reading and/or Mathematics] _____.

- If your student was in grade 3 in the spring, SOA growth was measured against the fall grade 3 Virginia Growth Assessment (VGA) result.
- If your student was in grade 4-8 in the spring, SOA growth was measured against the previous spring's SOL or VAAP result.

Fairfax County teachers and staff look forward to continuing to support your student's learning in the coming year. If you have questions about your student's continued growth in reading and/or mathematics, please contact your student's teachers.
